

## SMARTPHONE & TABLET GAMES SUMMIT

# HOW I SHIPPED FIVE GAMES IN TEN MONTHS

Graeme Devine  
*Game Designer, GRL Games*

Game Developers Conference® Online 2011  
**October 10-13, 2011 | Austin, TX**

# Today

- A brief history of GRL Games.
- If you're a small dev studio this is a blueprint that works.
- If you're a big dev studio this is a reason to fear me.

# Caveat

- The may seem like a talk about making a bunch of card games.
- But it really isn't.
- That's the cover story.

# December 6th 2010

grl  
games

I planned on making  
two games

I have yet to make  
either.

But I had a plan.

# Mac App Store

# Clandestiny

1/6/11

# Mac App Store

- First game was always going to be Clandestiny - but for the iPad.
- When Apple announced the Mac App Store I decided I could be there day one.

# Game Engine v. 0.1

# I. Client

# Meanwhile..

- At the same time my wife and daughter wanted me to make a solitaire game.
- They were playing a lot of solitaire on their iPads and thought they could design one that was better.

# Full Deck Solitaire

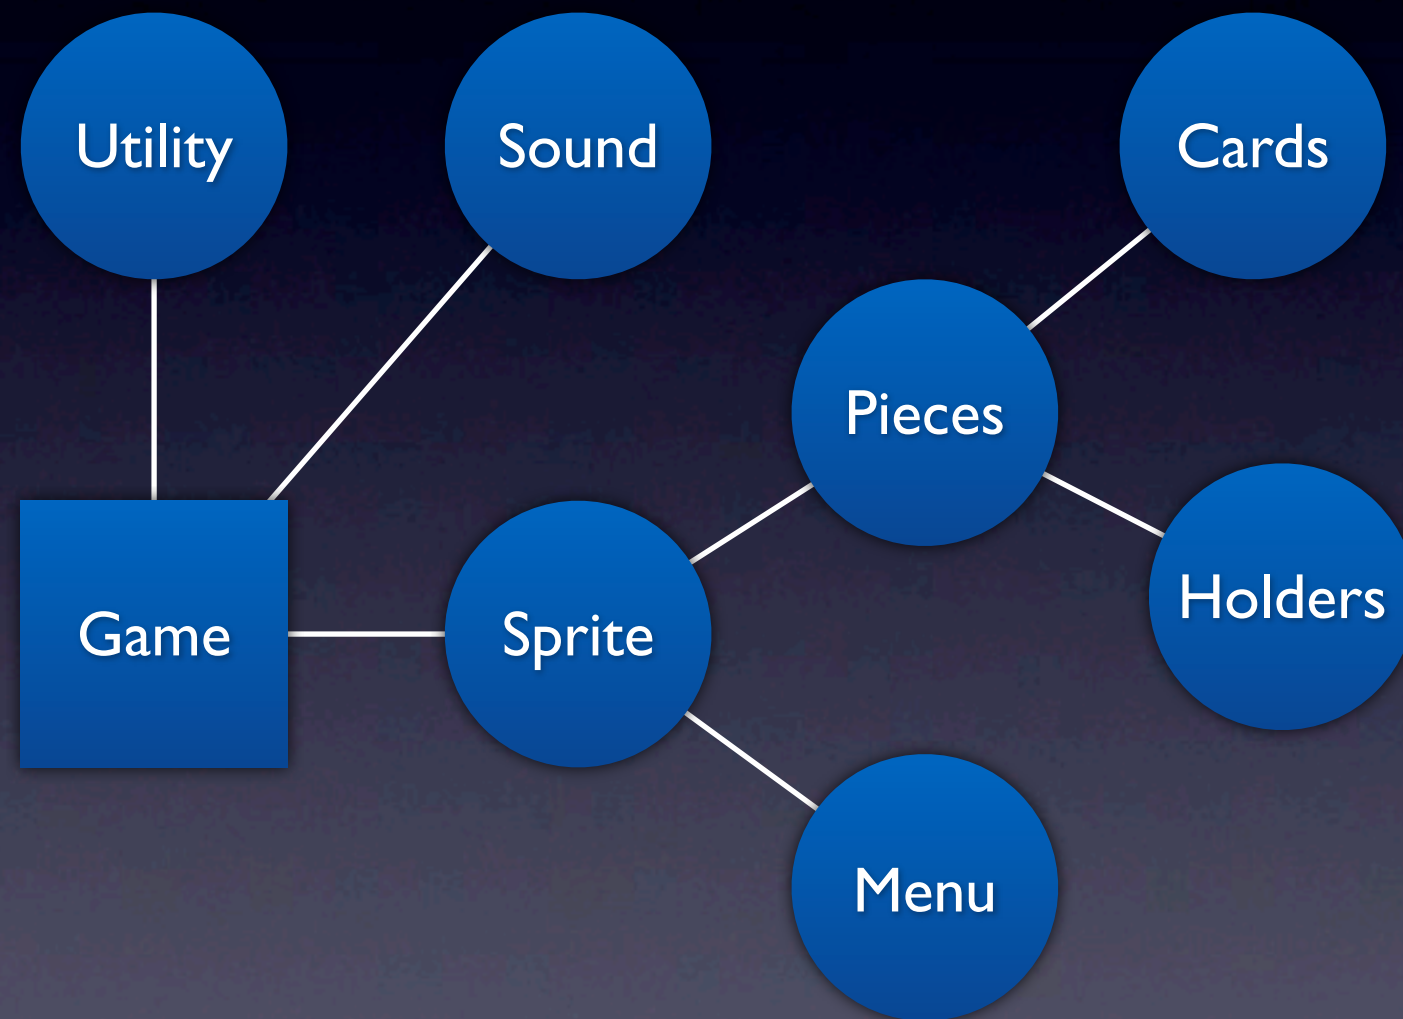

1/29/11

# Full Deck Solitaire

- 22 Solitaire Variations!
- Been number one card game for Mac OS X since it came out.
- Over one million downloads now.
- Concept of “game engine”.

# Game Engine v. 2

# But what about iOS?

- Bringing Game Engine to iOS took a week
- Could now run same source on two platforms.

# Full Deck Solitaire

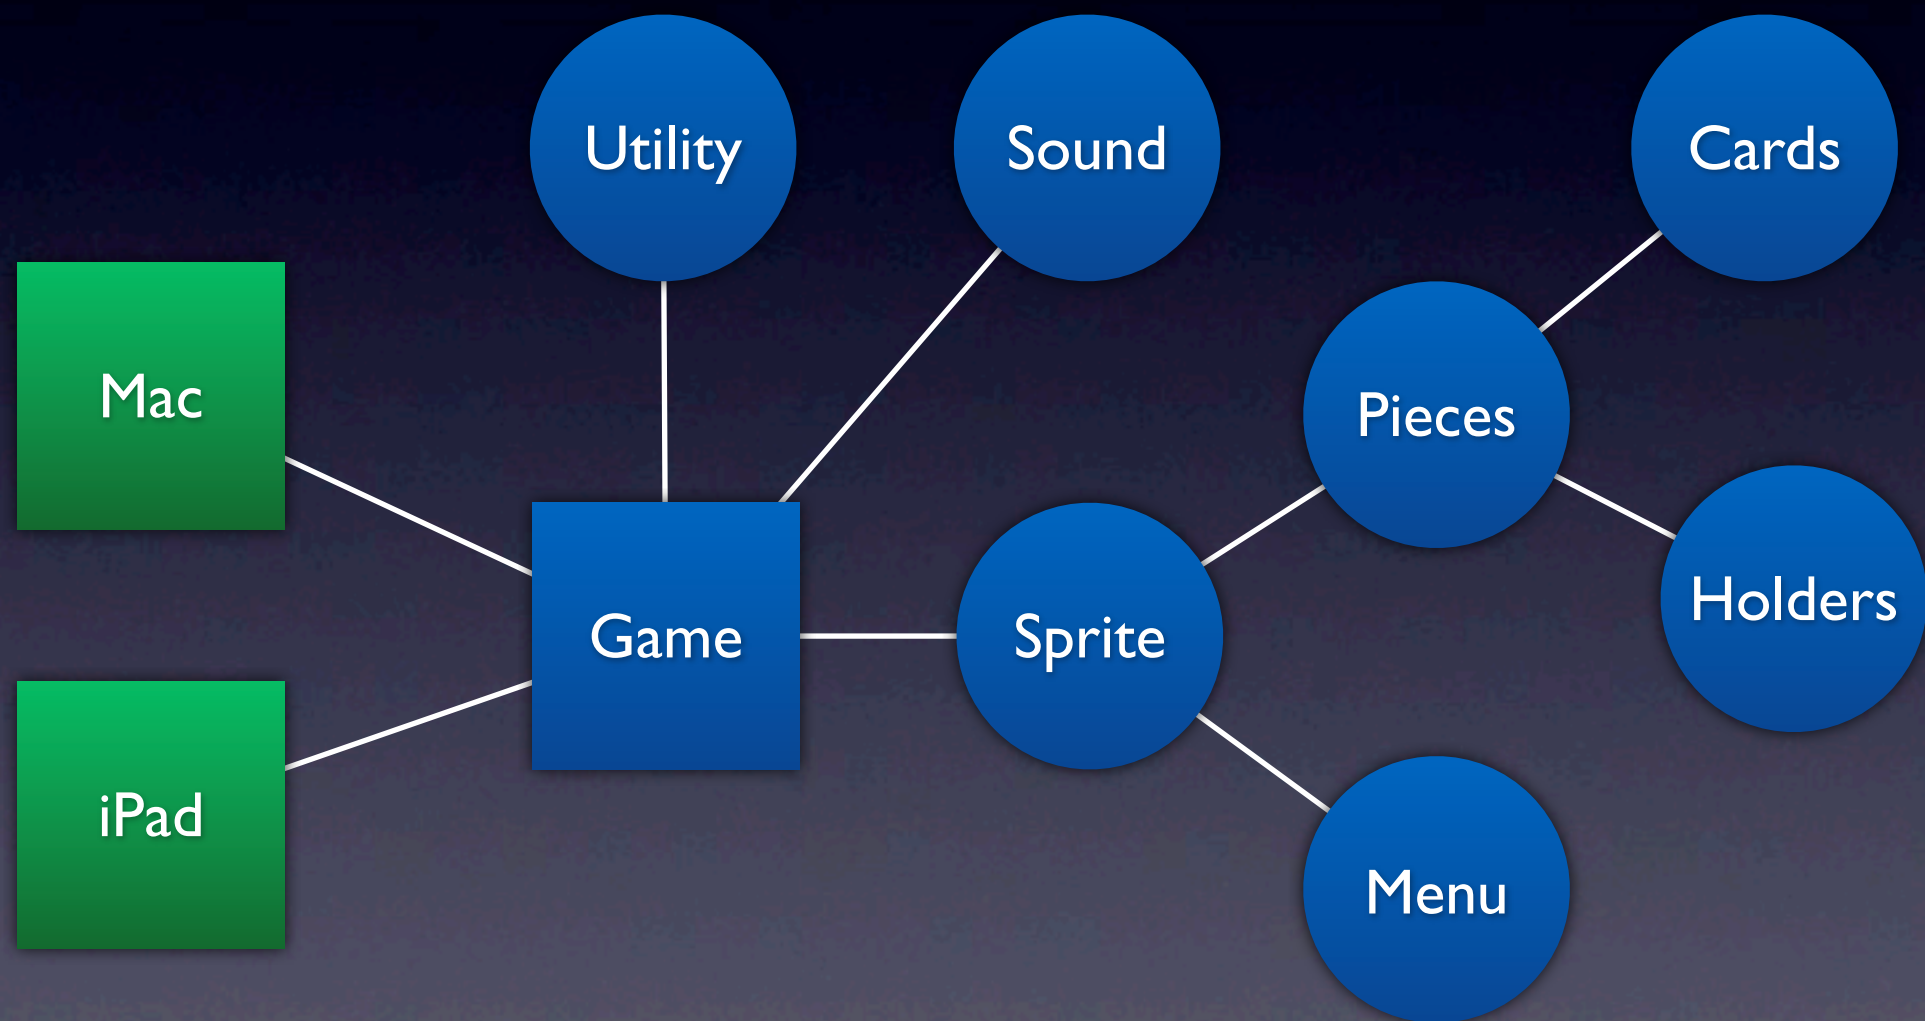

2/15/11

# iPad

- Back ported improvements to Mac OS X
- Support, support, support
- Revisions

# Game Engine v. 1.1

## 2. Better Client

# Adding to the picture

- Wanted to extend experience to friends
- Hide the work so the friend connection was natural and easy
- Build a system that would scale

# Full Deck Poker Solitaire

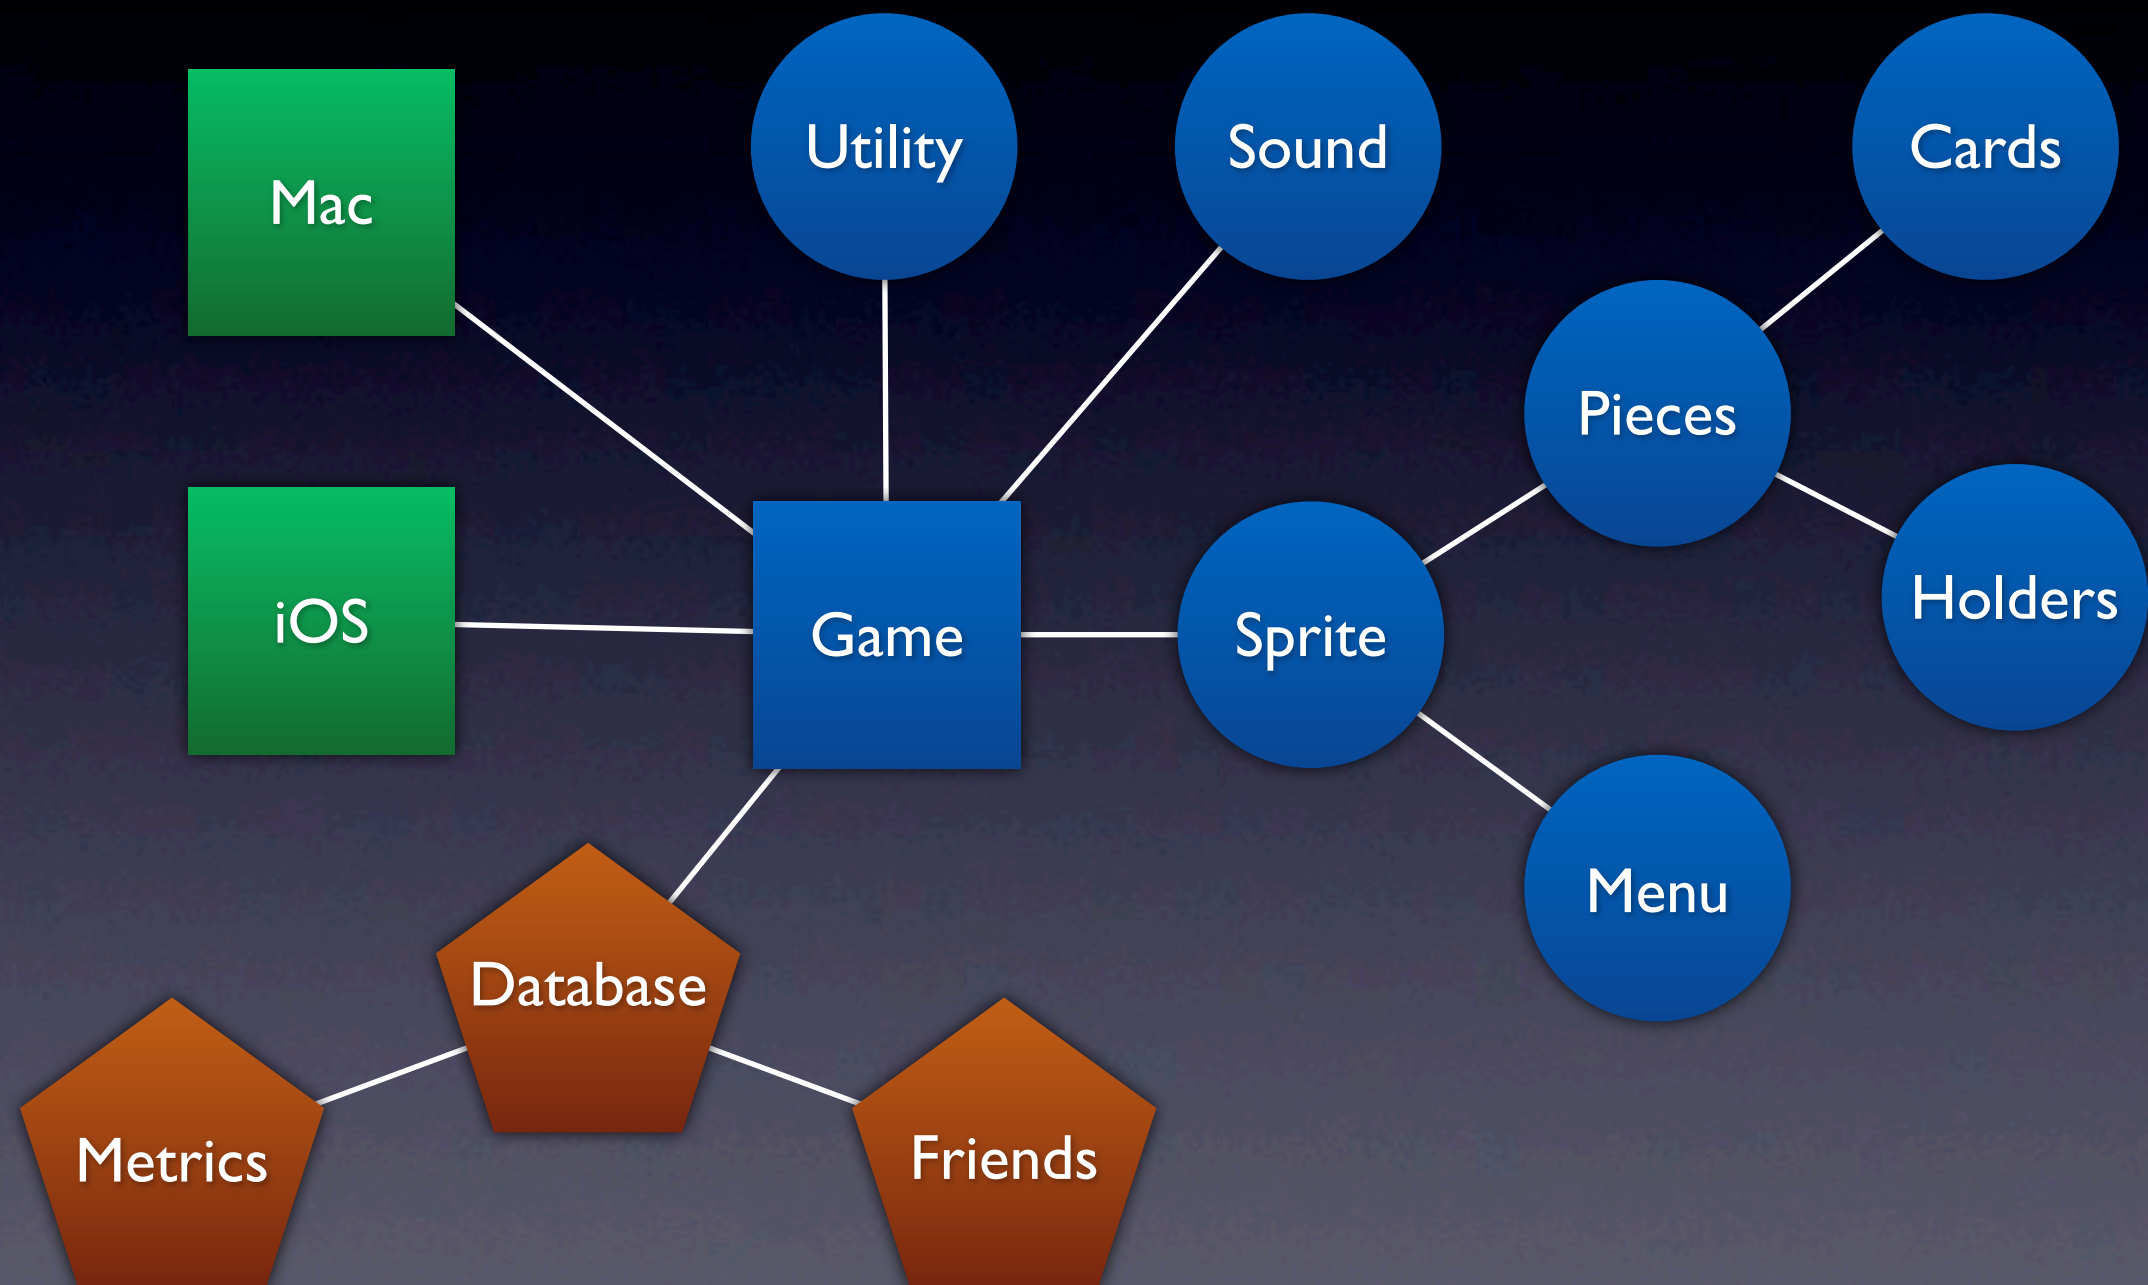

3/31/11

# Full Deck Poker Solitaire

- SQL server for users
- connect friends with a challenge
- lots of learning

# Game Engine v. 1.2

# 3. Connections

# Summer Break

# How Hard Can Poker Be?

- I made several wrong assumptions here.
  - Poker would be easy.
  - The AI would be simple.
  - People wanted to play with friends.

# How Hard Can Poker Be?

- I was completely wrong.
- Poker is really hard.
- The AI is incredibly difficult.
- People want to play with poker players.

# Full Deck Hold'Em v 1.0

8/22/11

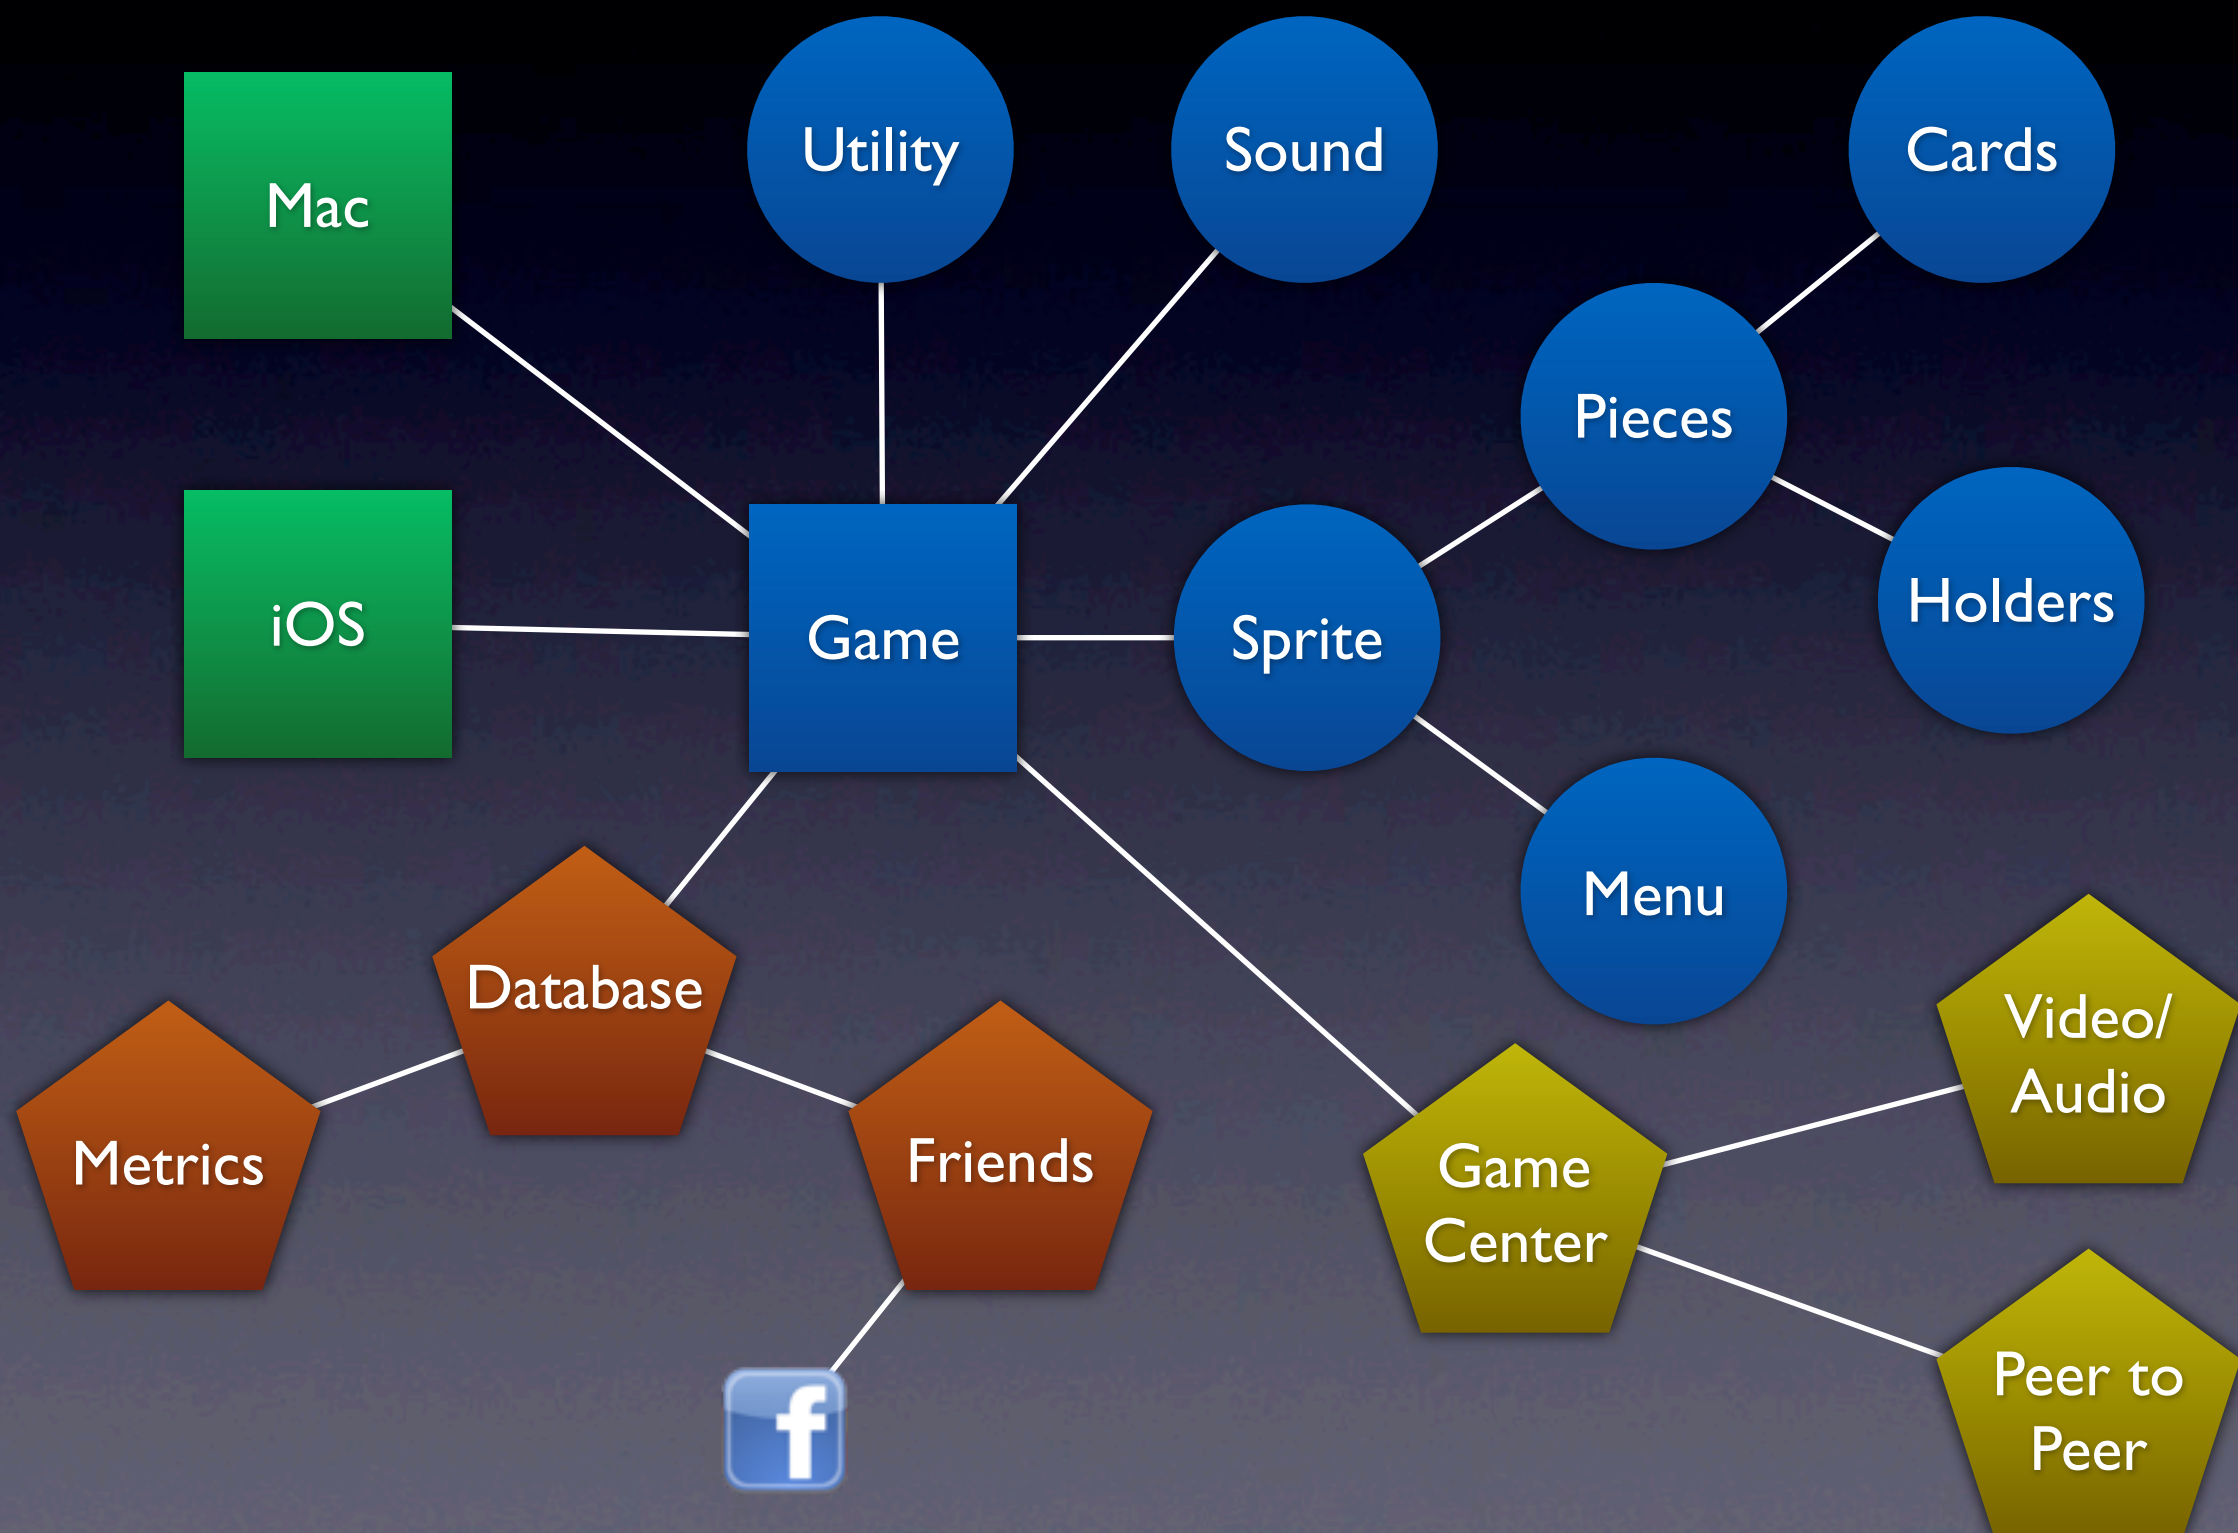

# Video

- The “hook”

# Game Engine v. 1.3

# 4. Better Connections

# Adding More

- Decided to see if I was on right track.
- Also, wife and daughter wanted me to make a word game.

# Word Chat

9/12/11

# Word Chat

- 7 days from starting to App Store submission.
- Updated once with whole new game mode.
- Second update coming with iOS 5 turn based game.

# 5. Execution

# Issues

- Game Center as a transport
- Finding friends and opponents isn't the same
- Anything that is not making is easier had to go

# Solutions

- Implement my own matchmaking / network code.
- Keep friends seamless.

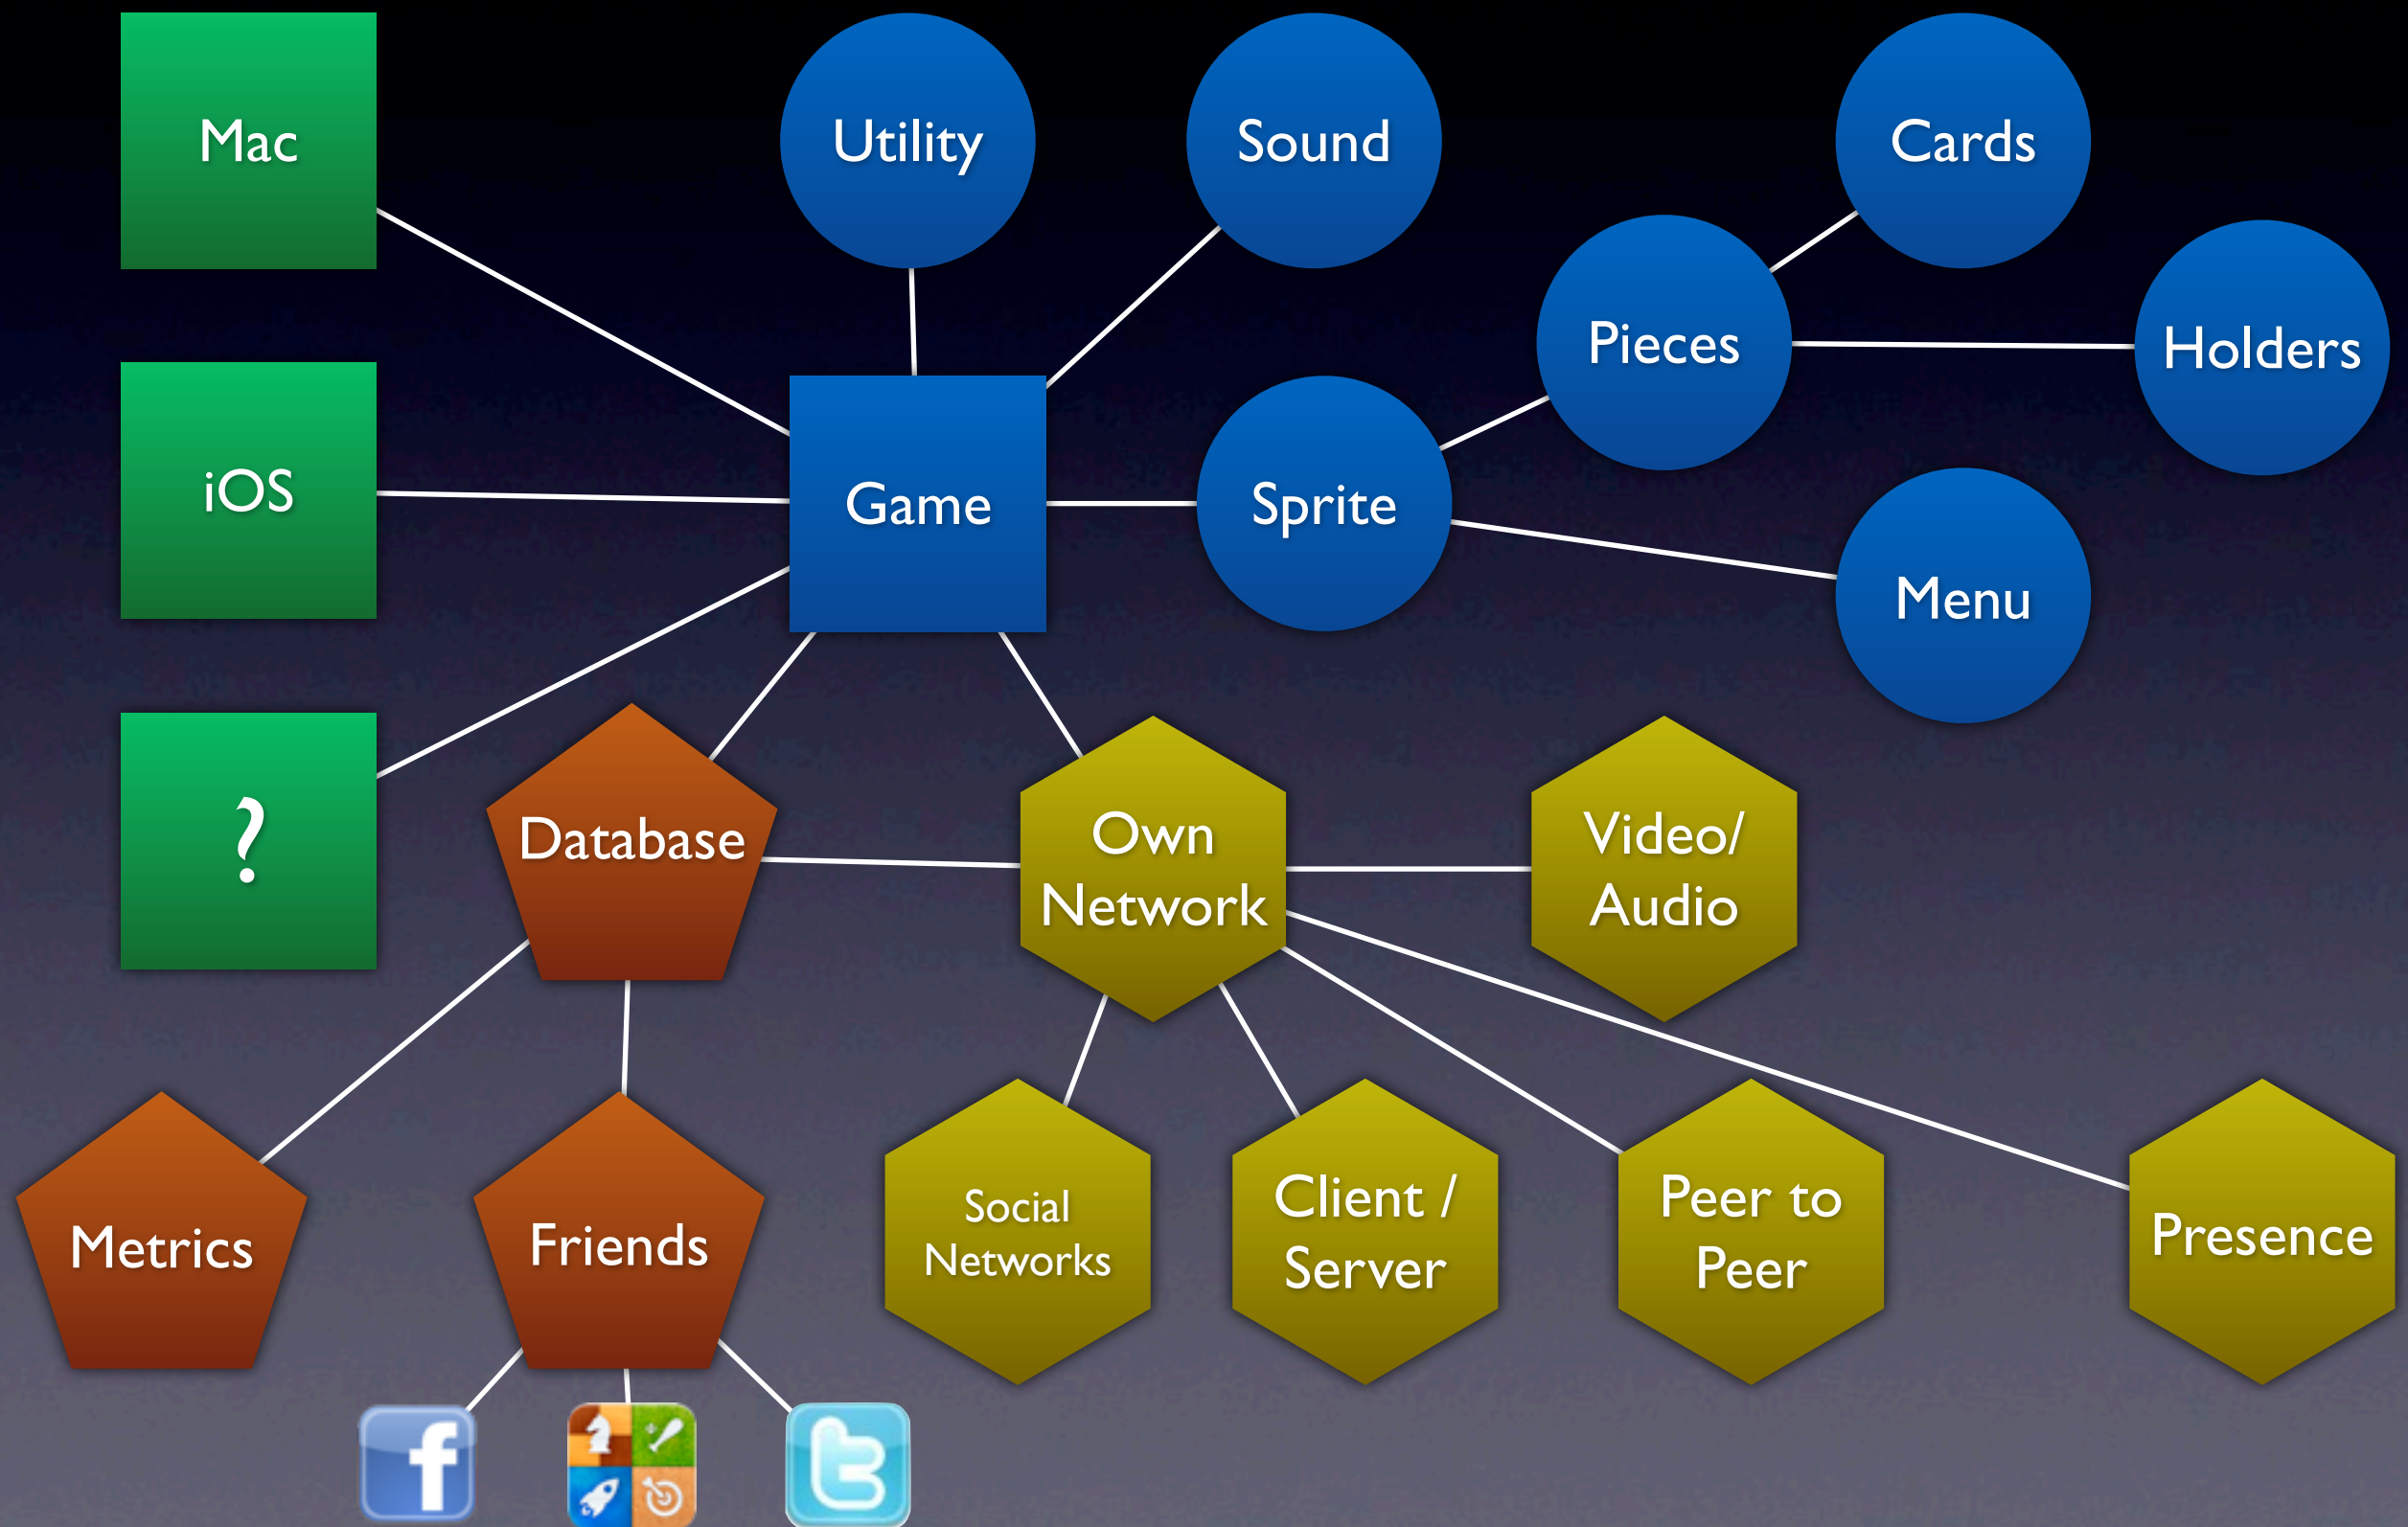

# Full Deck Hold'Em v 2.0

10/8/11

# Game Engine v. 1.4

# 5. NOW

# Game Engine v. 1.5

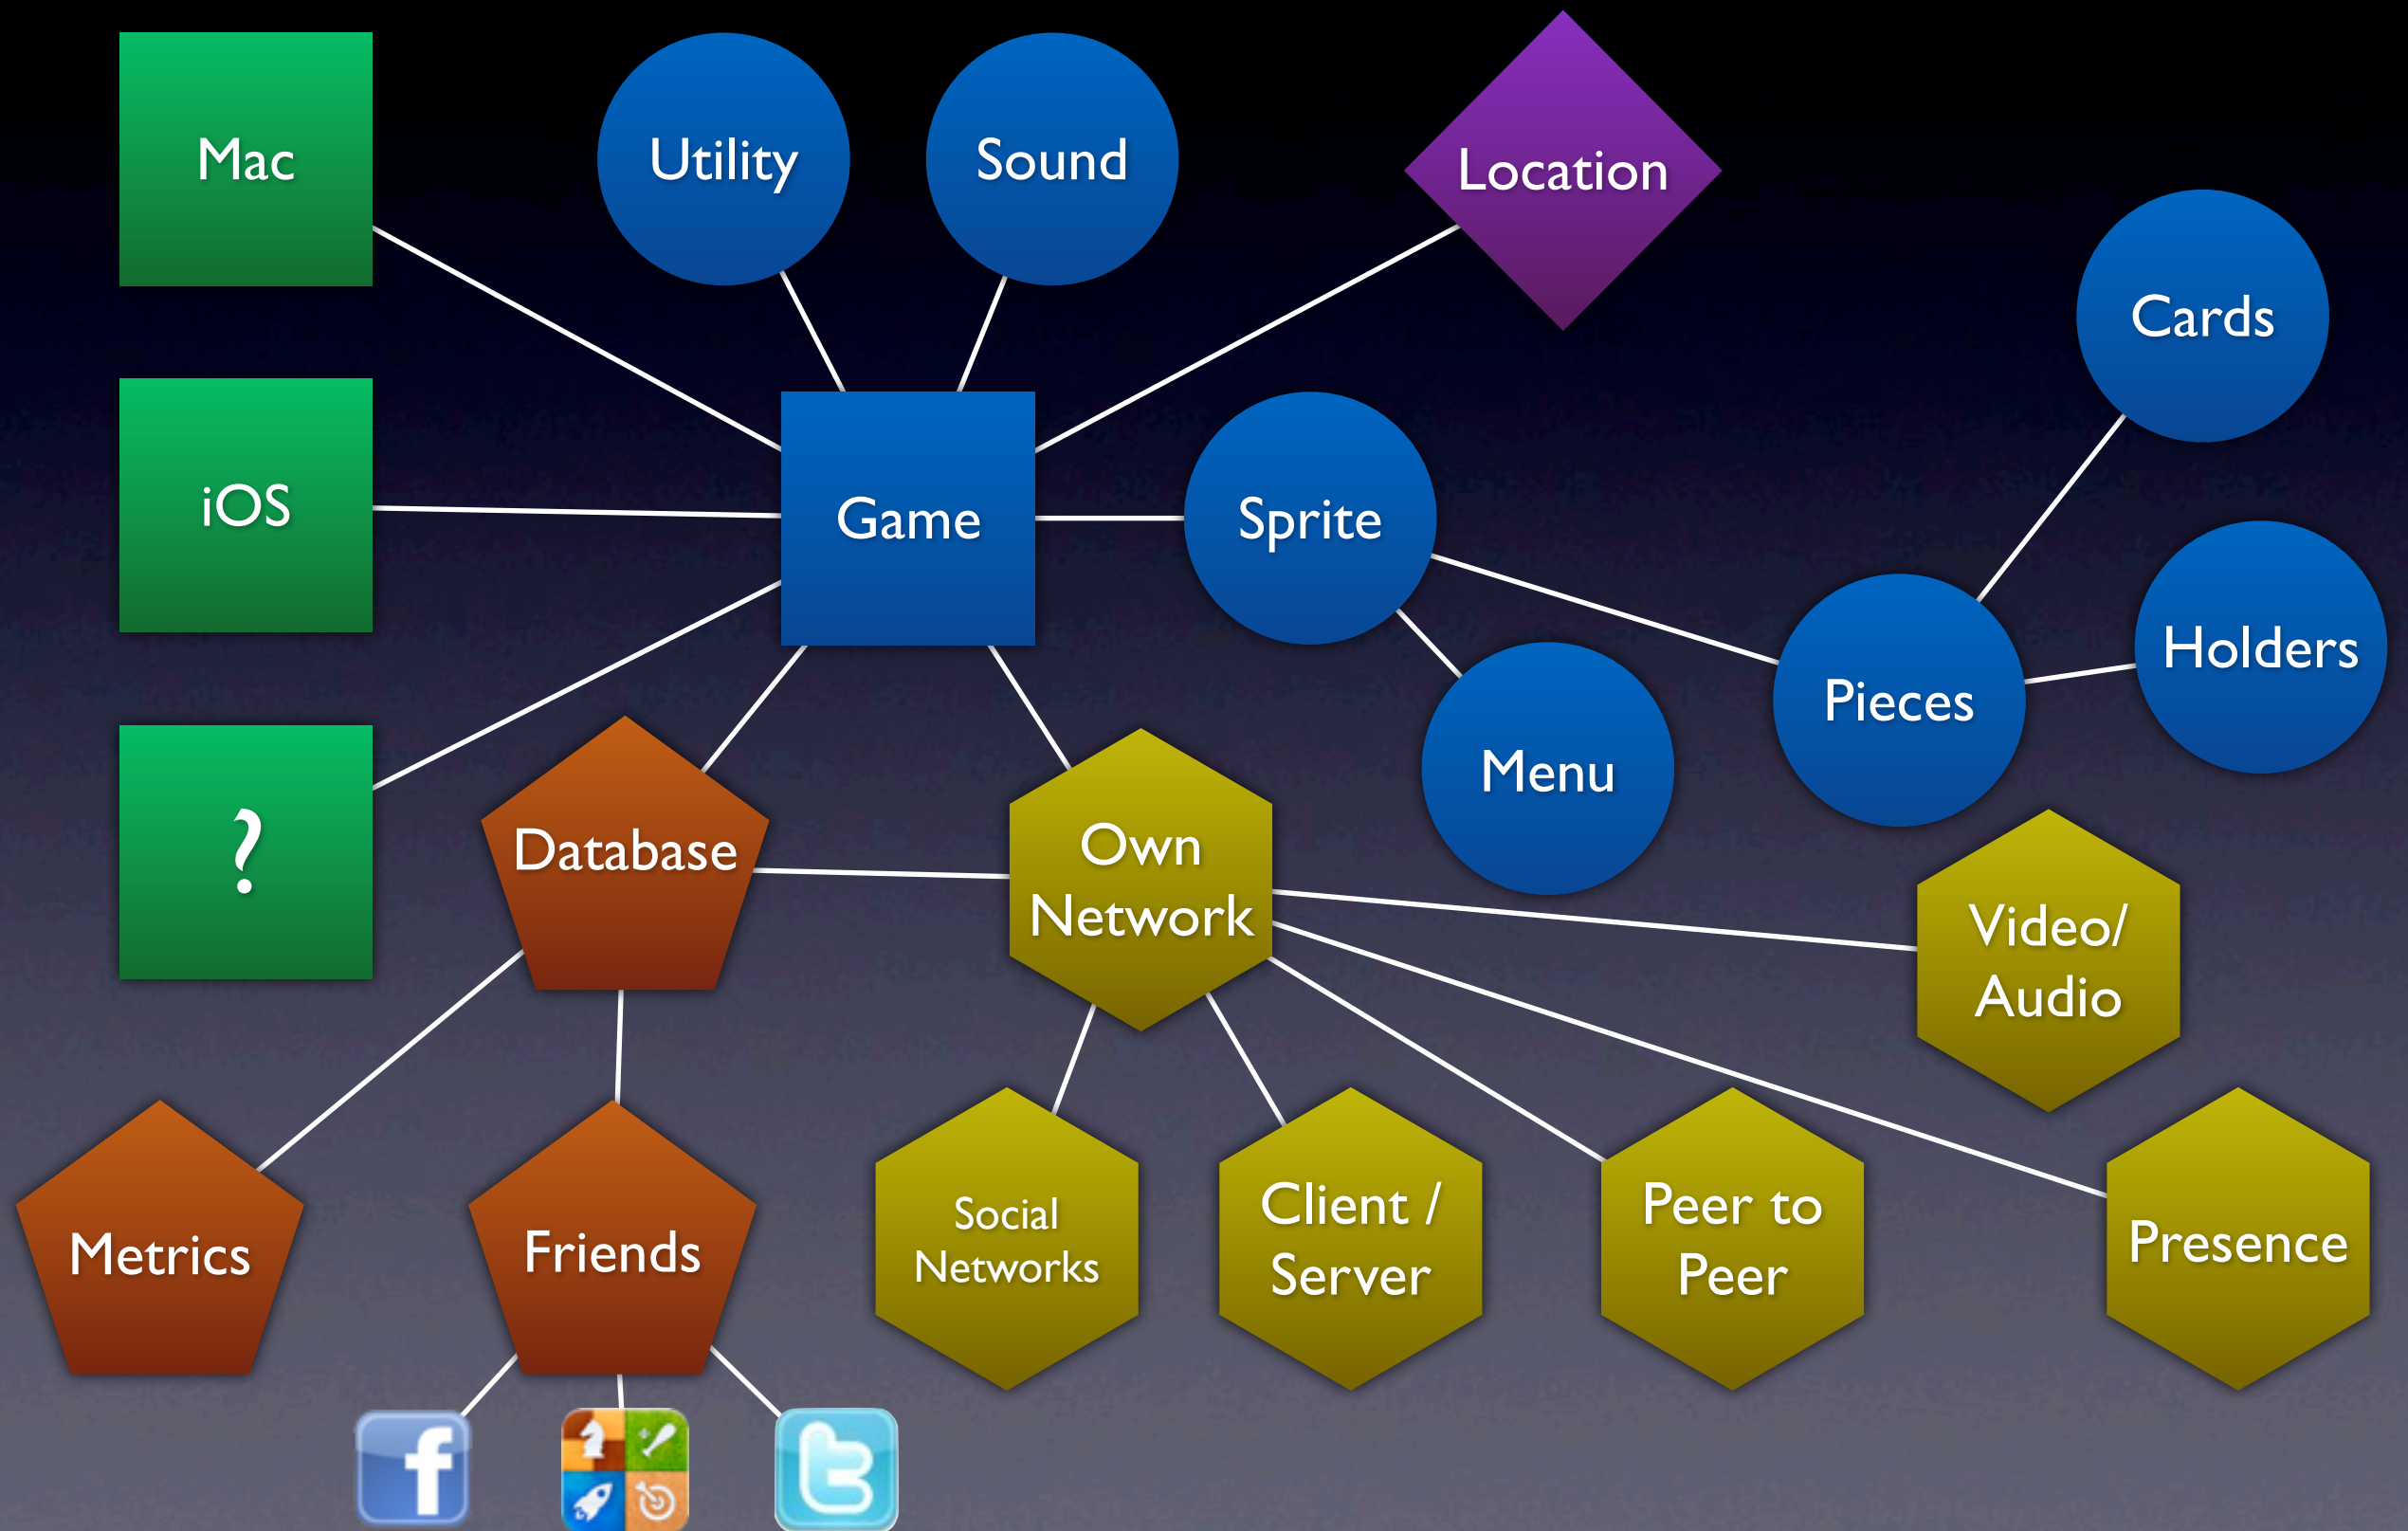

# GRL Games

- Yes, I shipped five games and twenty eight updates.
- But this year has always been about building a platform.

# Game Engine v. 1.5

# Thank You
