

UNCHARTED 3

DRAKE'S DECEPTION™

The Last 10
Going From Good To AWESOME

Introduction

Benson Russell

benson_russell@naughtydog.com

Senior Game Designer @ Naughty Dog

Primary AI and Combat Designer

Overview

- The last 10% takes 90% of the work
- Also referred to as Polish
- Can make a great game ... AWESOME
- One of the most important aspects of game development

Overview

- Seems to be the most **marginalized** aspect
- The fix can be **easier** than it seems:
 - A change in **mindset**
 - Better **distribution** of development time
- How **Naughty Dog** approached polish on Uncharted 2 and 3

Disclaimer

- By no means is this the **perfect** system
- The approach is a bit **controversial** internally
- The **KEY** take away is to allow for polish!!

What Is Polish?

- It is **not** about finding gameplay
- It is about **finalizing** your product
- **Removing** the blemishes and imperfections

What Is Polish?

Examples of items to polish:

- **Gameplay** related issues
- **Presentation** issues
- Fixing things we tend to think are “**status quo**”

What Is Our Approach

Set The **Quality** Bar **HIGH!!**

- Shoot for **PERFECTION**, don't settle
- "small" things just **hurt** the feeling of quality

Some Video Examples...

Animation Glitches

Unpolished

Polished

Camera Glitches

Schedule Accordingly

"Standard" Development Schedule

?? Polish ??

Pre-production

Production

Alpha

Beta

GOLD

OMG!?

YEAHEE

Naughty Dog Development Schedule

At 20% you need to hit a solid Alpha

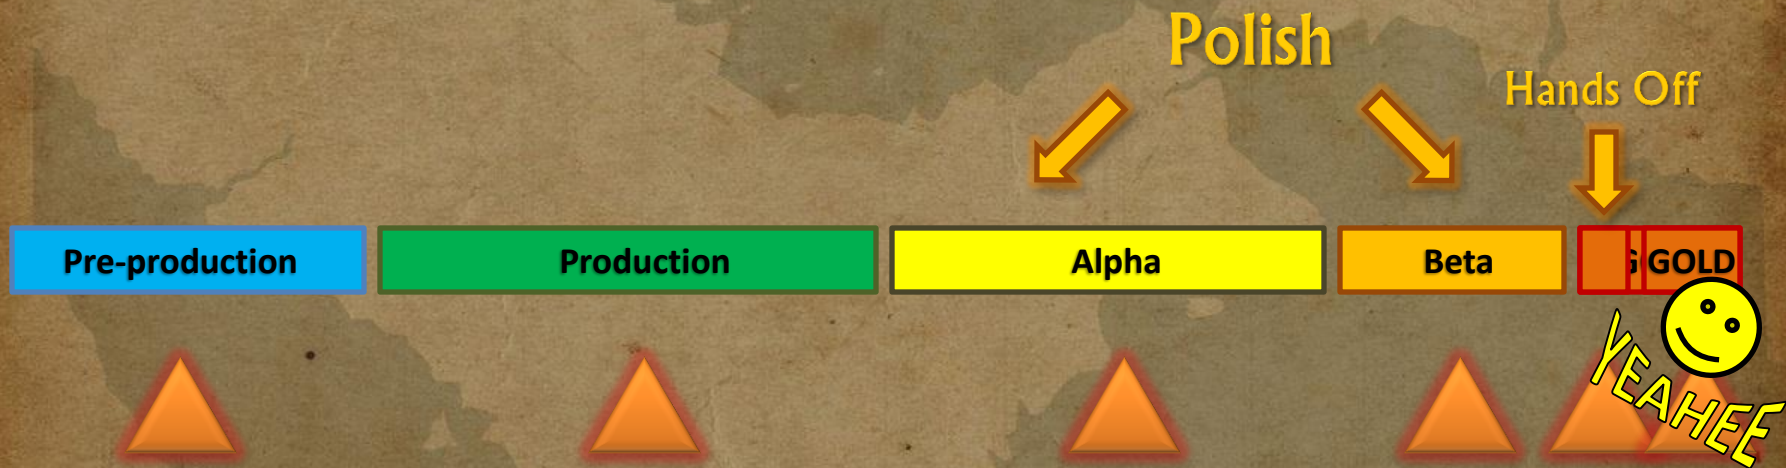

Naughty Dog Development Schedule

- Having more polish time **forces** you to **evaluate** the **progress** of your development earlier!

Don't Fear Change

- “Standard” practice dictates **DO NOT TOUCH**
- With **proper scheduling**, you can polish in Alpha

Naughty Dog Development Schedule

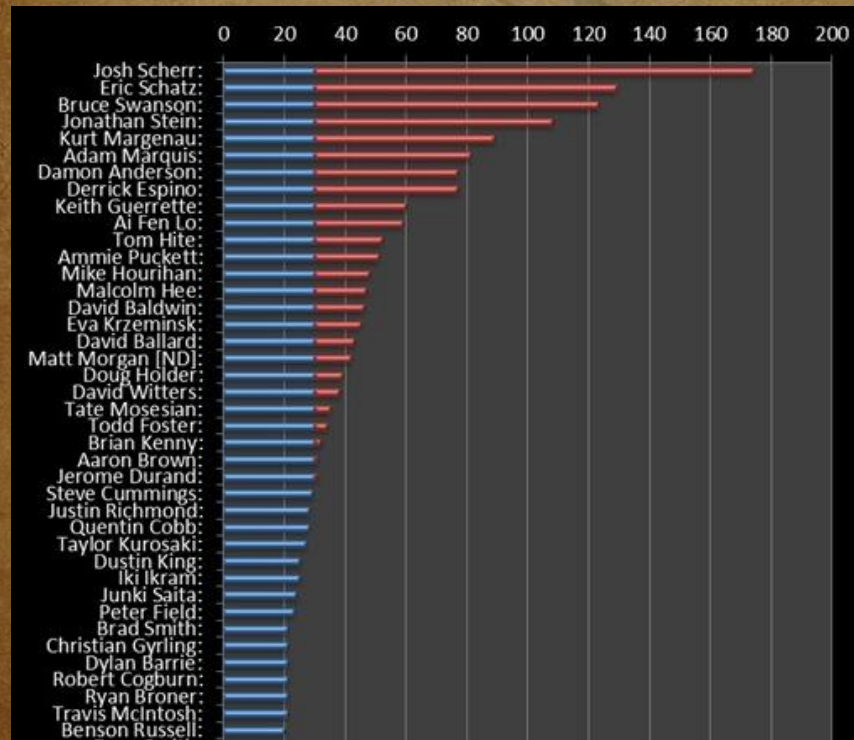

Rolling Deadlines

THE GAME

Rolling Deadlines

GOTCHA: too much overlap between sections

	Min	Average	Median	Max

Tiered Approvals

- Key people's **approvals** needed for fixes
- **Multiple** people must approve as you go
- Helps **mitigate** risks at a critical time
- Pick the **right** people to give the approvals

The All Seeing Eye

- Have a high-level person looking for polish **daily**
- They must **understand** what to look for
- Have to **balance** polish vs. time
- **Not** a dictatorship role
- **Critical** role to catch things during the craziness

[One Frame Off](#)

[Render Pop](#)

Takeaway

- The last 10% is the hardest, but gives highest payoff
- Schedule time for polish!! 20% – 25% at least!!
- You can use your Alpha / Beta time for this purpose
- A rolling schedule can help to focus your team
- Tiered approval systems will keep you in check
- Have a dedicated overseer to catch things daily

Takeaway

Aim for **perfection!!**

Set the quality bar **HIGH!!!**

We're HIRING!!
