

Using Technical Testers

Greg Derk

Test Manager – Turn 10 Studios

Agenda

Theory

- Definitions
- Practical examples

Practice

- Use of Technical Testers @ Turn10
- Hiring Technical Testers
- Final Thoughts

Definitions

Standard testers

- Interact with the game like a consumer
- Minimal knowledge of how the game is created
- “Black box”

Technical testers

- Interact at both component and consumer levels
- Uses same skills as feature and content creators
- “White box” or “Grey box”

Practical Examples

Code

Practical Examples

Code

Practical Examples

Code

Standard testers

- Do the steps in the achievement
- Try to speed up the process

Practical Examples

Code

Standard testers

- Do the steps in the achievement
- Try to speed up the process

Technical testers

- Inspect code to find how achievement is triggered
- Modify function's input

Practical Examples

Content

Technical Testing

@ Turn10

- Conscious effort moving to Technical Testers
- Able to evaluate changes over many versions
- Not all data is conclusive
 - Some gaps filled by interviews/team knowledge

Staffing Levels

End-Game

	Full Test Pass	Shutdown Time
FM3	6 weeks	15 weeks
FM4	5 weeks	13 weeks

Cost Implications

Cost Implications

Cost for standard vs. technical testers

Code Testers

25-40%
more expensive

Content Testers

5-10%
more expensive

Cost Implications

Cost per good bug

Code Testers

45%
less expensive

Content Testers

5%
more expensive

Changes @ Turn10

- ▣ Testing happens earlier
- ▣ Test is integrated into production process
- ▣ More predictable schedule
- ▣ Increased Dev/Art bandwidth

Hiring Technical Testers

Hiring Technical Testers

- Traditional test skills are the base of everything

Hiring Technical Testers

- Traditional test skills are the base of everything
- Have devs/artists and testers on your interviews

Hiring Technical Testers

- Traditional test skills are the base of everything
- Have devs/artists and testers on your interviews
- Dev/producer/artist with a break-it mentality, or a need to make it “right”
 - Takes a broad view, rather than fine details

Hiring Technical Testers

- Traditional test skills are the base of everything
- Have devs/artists and testers on your interviews
- Dev/producer/artist with a break-it mentality, or a need to make it “right”
 - Takes a broad view, rather than fine details
- Prepare your org

Thoughts

- ▣ Higher cost produces greater benefit than input
- ▣ Invest slowly at first
- ▣ Standard testers are still needed; Technical testers aren't an end-all be-all solution
- ▣ Don't discount the intangibles

Thank you

Q&A up front
