PART 2: PAID USER ACQUISITION

Eyal Grundstein

VP of User Acquisition

GSN Games

User Acquisition Funnel

User Acquisition Thesis

A Huge UA industry has emerged

\$72B and counting!

Mobile Internet Ad Spending Worldwide, 2014-2019

	2014	2015	2016	2017	2018	2019
Mobile internet ad spending (billions)	\$42.35	\$72.06	\$104.96	\$136.70	\$169.11	\$198.81
—% change	122.3%	70.1%	45.7%	30.2%	23.7%	17.6%
—% of digital ad spending	29.4%	42.3%	52.9%	60.3%	66.2%	70.2%
—% of total media ad spending	7.9%	12.7%	17.3%	21.3%	24.8%	27.6%

Note: includes display (banners, video and rich media) and search; excludes SMS, MMS and P2P messaging-based advertising; ad spending on tablets is included

UA KPIs

Pre-
install

- Click-through rates (CTR)
- Install-rates (IR)
- Impressions to Installs
- Cost per Install (CPI)

Post-
install

- D1, D3, D7 Retention
- D1, D3, D7 ARPU
- Payer Conversion %
- Cost per Payer (CPP)

UA Cycle

Measure - Attribution

- Click-based attribution - last click gets the install
- Post-install events can be shared with trusted partners for further optimizations

Optimize

USER SEGMENTATION

CHANNEL

CREATIVE

Scale

- Non-linear relationship between CPI and volume
 - 2X CPI doesn't mean 2X Installs
- Scalable channels are rare
 - Follow user behavior
 - 80/20 rule applies

PART 4: RETENTION

Bob Bates

Independent Game Designer, Writer, Producer

WHAT IS RETENTION?

- Day One (D1) • 40%
- Day Seven (D7) • 20%
- Day Thirty (D30) • 10%

Why Do We Try to Increase Retention?

- The longer they stay, the more likely they are to pay
- The longer they stay, the more likely they are to evangelize and be viral
- If your monetization is based on selling ads, the longer they stay, the more ad revenue you will generate

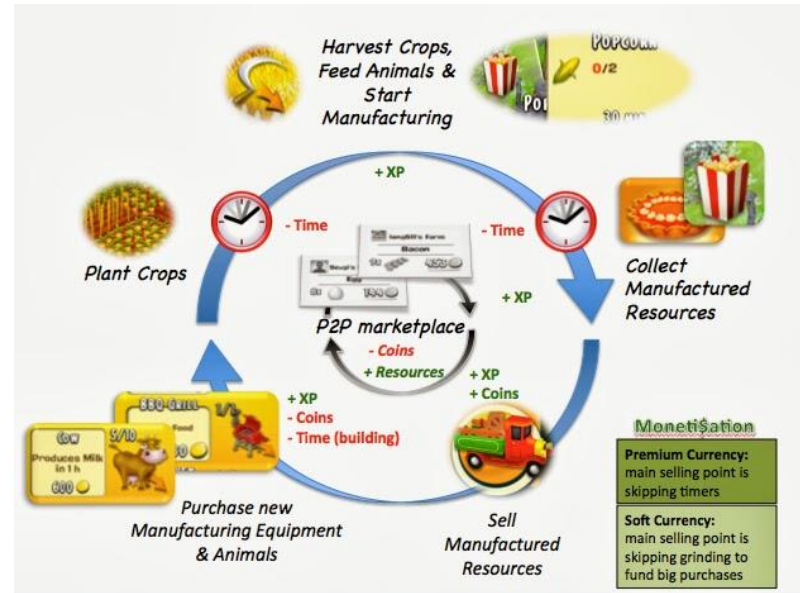

Designing for Retention

- Give your players a fun experience quickly, and give them LOTS and LOTS of reasons to come back again.
- Keep players in your game longer
- Stay in their head, and remind them to come back
- Reward them when they do

Retention: When they're NOT playing, stay in their head, and then remind them to come back

- Appointment mechanics
 - “I must remember to log in after breakfast and collect my shipment of widgets.”
- Timer notifications
 - “Your dragon is ready for battle”
 - “Your crops are about to wither.”
- Turn-based notifications
 - “Your opponent has made a move.”

Retention: When they're NOT playing, stay in their head, and then remind them to come back

- Bonuses for frequent play and streaks
 - “Play now and collect your daily bonus”
- Time-Limited Events and Tournaments
 - “Special limited-edition item available only through Thursday”
- General reminders
 - “Your villagers miss you!”

Retention: Reward Players When They Return

- Rewards and Aspirations
 - Show players their progress
 - Show players their investment
 - Show empty slots of things they can acquire
 - Titles and Leaderboards

Rewards and Aspiration: Visual Progress

Cognitive Dissonance: Show Investment

Rewards and Aspiration: Show Progress on the Gameboard

Rewards and Aspiration: Slots to Fill

Mobile app interface showing a leaderboard for the "LITERATURE" category. The app is running on a device with status bar showing "O2-UK", "10:51", and "53%". The interface includes a "Back" button, a toggle for "All time" and "This week", and a menu icon. The leaderboard lists 23 users with their profile pictures, names, levels, and flags. The top users are whitelighter (Level 13, USA), Mallory DuBose (Level 13, USA), Kristin Karset (Level 12, Norway), Ktate93 (Level 12, USA), Mazza (Level 11, USA), Rúrik Karl Björnsson (Level 11, Iceland), Jennifer Allen (Level 11, UK), Isabela Carvalho (Level 11, Brazil), Mercy Bell (Level 10, USA), Maggie Mireles (Level 10, USA), Hildur Kristín (Level 10, Iceland), Drew Ball (Level 10, USA), Lydia Ward (Level 10, USA), and PrufrockPeacock (Level 10, USA). The bottom navigation bar includes icons for "Global", "Country", "Nearby", and "Friends".

QuizUp interface showing a quiz result for "SWITZERLAND" in the "Veronica Mars" category. The result is "I'M THE BEST IN SWITZERLAND IN Veronica Mars (TV)". The interface includes a "QuizUp" logo and a "Follow" button. A tweet from @bubbehogmt is visible below the result, stating "Boom. Best in Veronica Mars in Switzerland on #QuizUp! quizup.com/?source=share" with a timestamp of "11:17 AM - 16 Mar 2014".

QuizUp interface showing a "CONGRATULATIONS!" message for a user who has won a trophy. The message states "YOU ARE THE BEST IN THE WORLD IN Futurama (TV)". The interface includes a "Share" button.

Secret Weapon #1: Narrative

Secret Weapon #2: Humor

Aishah just got wood!

Aishah can get wood on a daily basis now, with the new sawmill. There's more wood than Aishah bargained for if you want some too.

Recap: The Retention Takeaway

- Keep players in your game longer
- Stay in their head, and remind them to come back
- Reward them when they do

PART 5: MONETIZATION

Eric Todd

Founder

Orange Monkey Games

WHAT IS MONETIZATION?

1. Acquire players
2. Retain players
3. ...
4. Profit?

WHAT IS MONETIZATION?

Fanatical Players

Universal?

- Unsurprisingly, true for hardcore games
- Also true for “casual” games

Fanatical Players

Universal?

- Unsurprisingly, true for hardcore games
- Also true for “casual” games

MUST

- Support and reward fanatical play
- Build into core of game’s design
- Cannot be retrofitted

Long Term Retention

Long Term Retention

Long Term Retention

Why?

- Area under the curve
- Conversion to payer
- Escalating probability of payment
- Golden cohorts

Long Term Retention

Why?

- Area under the curve
- Conversion to payer
- Escalating probability of payment
- Golden cohorts

MUST

- Provide on-going novelty
 - Content
 - Mechanics
 - Social Interaction
- Build into core of game's design

Motivation and Opportunity to Pay

- Fanatical players + Long term retention = Easy mode
- Anything else = Permadeath Mode

Motivation and Opportunity to Pay

- Fanatical players + Long term retention = Easy mode
- Anything else = Permadeath Mode
- Opportunity is obvious
- Motivation is where variation arrives

Common Motivations to Pay

Accelerate progress

Tweak gameplay difficulty

Common Motivations to Pay

Accelerate progress

Tweak gameplay difficulty

Competitive advantage

Common Motivations to Pay

Unlock content

Self expression

Gifting

Fairness

(AKA Enlightened Self-Interest)

- Short-term \$ *versus* long term retention
- Payers *versus* non-payers
- Extrinsic *versus* intrinsic motivation

Reason and Opportunity to Pay

MUST

- Be tailored to your game
- Feel fair to your players
- Build into core of game's design
- Cannot be retrofitted

RECAP: MONETIZATION TAKEAWAYS

Create fanatical players

Retain your fanatics indefinitely

Provide fair reasons to pay

Part of core game design

Optimization: easy or pointless

PART 6: LAUNCHING

John Welch

CEO

Making Fun Games

Launching a F2P (Mobile) Game

1. Good game
2. Testing
3. Community
4. Geo-locked testing
5. Often overlooked
6. Feature
7. Launch
8. Now the work begins
9. Things to skip

MAGE AND MINIONS

44

Frost Nova Ready

928
2048

3,068

60

1. Have a Good Game

- Good, not great
 - MVP
 - Squash bugs but don't polish forever
 - Nothing can help a bad game
- Specific, well-understood risks
 - Ideally related to your key innovation
 - Plan B
- GENEROUS economy
 - Retention >> Monetization

2. Testing

- USE GOOGLE ALPHA / BETA
 - Fast/easy updates
 - PERSON-based free purchases (so actually release betas!)
- USE BUILD #'s DILIGENTLY!!!!
 - Else you will waste time testing old builds
- TestFlight is perfect... with serious limitations
- Amazon's Live App Testing is great but notifications are terrible

3. Community

- How will you converse with players?
(critical even for 1-P games)
 - Built-in feedback mechanism
 - Forum
 - Facebook, Twitter
 - 3rd party sites
- Support Tools

4. Geo-locked Pre-Release

- Test KPIs
- Utility?
- Where?
 - Canada, Australia are typical
 - Be more creative if you don't care about monetization data

5. Easily Overlooked

- Metrics
 - Retention: D1, 7, 14, 30, 60, 90
 - $\text{ARPPU} \times \% \text{ purchasing} = \text{ARPD AU}$
 - CLV
- Login / Persistence
- Don't release on a Friday

6. Getting Featured

- Plan Ahead
 - Innovate.
 - What platform features will you embrace?
 - Art & video assets
- Work personal connections
 - Ask what would maximize chances
 - Set a release date 4+ weeks out. Hit it. With quality.
- If at first you don't succeed
 - Parity on big stuff -- but focus where you have traction
 - Don't harass your contact
- Amazon w/ feature >> Apple w/out feature or ads

7. Launch

- Woo!

8. Now the (different) work begins

- Magic equation: $CLV >? CPI$
- Read & respond to reviews
- Compete on quality
 - Slower road. More sustainable?
 - Bug-fix sprints
 - Complete re-write of graphics engine, redesigned many levels
 - Ongoing tweaks to prevent OP, exploits
 - Diligent community support, periodic bug fix sprints
 - 90% quality, 10% monetization
 - 4.7+ rating (all platforms)

9. Skip for now

- New features – bucket to maximize featuring
- How to get CLV > blended CPI?
 - Multiplayer, limited-time events
- Localization
- Protect best platform – launch more slowly
- X-platform
