What is Kenshi?

The Role of Kenshi's Music

- Represent the World
- Indifferent to Player Actions
- Generate Music Combos
- Vary Timbre, Texture, and Mood based on World Factors.
(*Day/Night & Biome*)

Instrumentation

- 4 Biome Groups (Desert, Plains, Ashlands, Swamps)
- Instruments for Colors & Mood
- Swamps = Slide Guitar, Banjo, Jaw Harp, etc.

"Interactive" Music System

Canopy Layer

Melodies, Motifs

Frame Layer

Harmony, Rhythm

Drone Layer

Tonal Center, Texture, Mood

*Instrumentation Changes for
Day/Night Cycle & Biomes

*Player sets music playback frequency (slider)
Engine randomly selects what layers to play in
that defined amount of time.

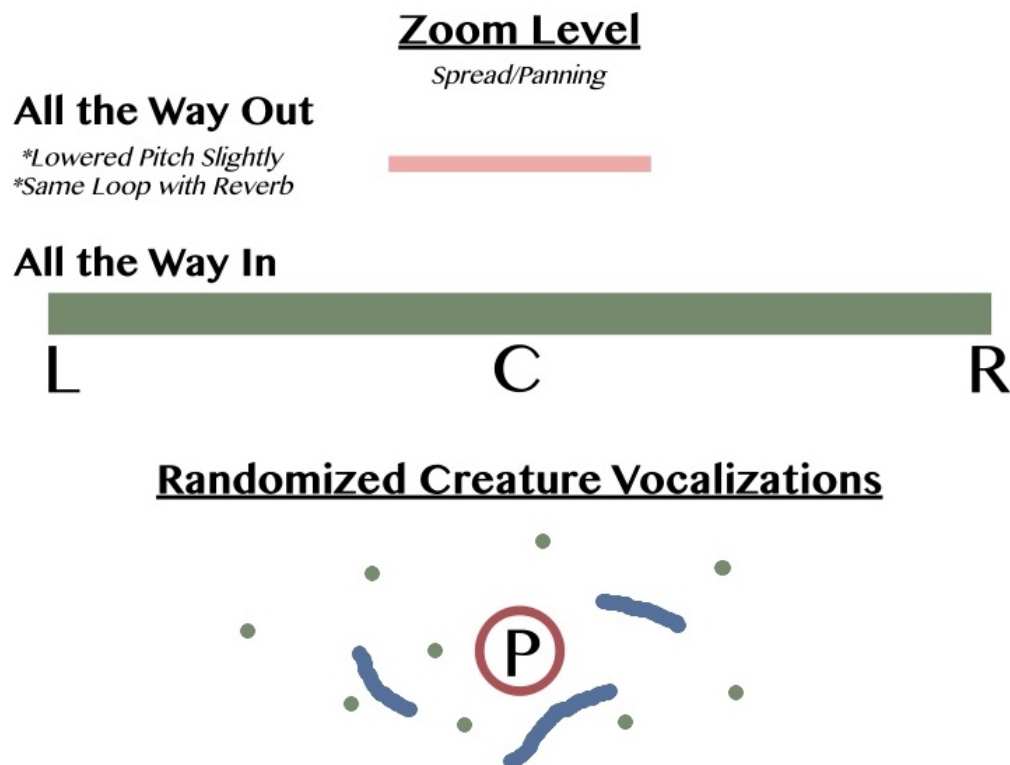

Sound Design Considerations

- Avoid the “Hollywood” sound
- Think Big Picture rather than tiny details
- Prioritize “High-Usage” actions
- Silence is Good

Ambient Environment System

Racial Vocal Considerations

- No real language or traditional dialogue. Primarily exertions, idle sounds, etc.
- Each race has their own identifiable vocal timbre.
- Primary purpose is to add life, background, & context.

Skeleton VO Steps

1. Record Phrases

2. Reverse

3. EQ, Compress

4. McDSP Futzbox

5. EQ Again
