FALL 2017

# How AR is Transforming the Building and Construction Industries

Scott Montgomerie  
Co-Founder and CEO

VIRTUAL REALITY DEVELOPERS CONFERENCE FALL 2017 | SEPTEMBER 21-22, 2017 #VRDC17

AR is really hot right now

# Augmented Reality is the Future UI Paradigm

**Augmented Reality**

# AR is the new UI paradigm

- Improved Comprehension
- Knowledge Transmission
- On-Demand Knowledge

# But the AR Market is Early

Gartner **Hype Cycle** for Emerging Technologies, 2017

# Practical Applications?

# Practical Applications - Yes!

Manufacturing

Construction

Maintenance

Quality Assurance

Training + Education

# Construction + Manufacturing

- Common Attributes
  - Planning in 3D
    - BIM in construction (AEC)
    - CAD/PLM in manufacturing
  - Assembly Instructions
    - Blueprints in AEC
    - Diagrams / Text Instructions in Manufacturing
  - Compliance / Audit Trail
  - Verification / Inspection
  - Maintenance / Facilities Management
  - Remote Collaboration

PHOTO: MARK ELIAS/BLOOMBERG VIA GETTY IMAGES

# AR can help with all of these!

## Common Attributes

- Planning in 3D
  - BIM in construction (AEC)
  - CAD/PLM in manufacturing
- Assembly Instructions
- Compliance / Audit Trail
- Verification / Inspection
- Maintenance / Facilities Management
- Remote Collaboration

# Why do we even care?

- Manufacturing
  - 250% increase in productivity in the last 50 years
  - But still we need to make things faster and cheaper

**762 / year**  
**Backlog: 6000**  
**= 8 year wait**

## AIRBUS

46 Year  
History

Backlog

# Why do we even care?

- Construction
  - Construction productivity decreased 20% in the past 40 years
  - 65-75% of any building cost is labor, building materials and overhead
  - For every building you build in the future, it will cost more than it will today

## Overview of productivity improvement over time

Productivity (value added per worker), real, \$ 2005

\$ thousand per worker

McKinsey&Company

# Success Stories

Boeing with Upskill's Skylight platform cut production time substantially and lowered error rates to nearly zero

# Success Stories

## Success Stories

- Caterpillar branded an AR Remote Assistance tool
- Helps technicians and experts communicate more effectively

# This is just the beginning...

- Hololens makes a lot of these initial use cases possible
- Almost every industrial customer wants head worn displays.
- For many of these use cases, robust tracking is essential

# What about ARKit / ARCore?

- Apple and Google's investment in the space means AR is accessible to everyone
- Applications previously limited to HoloLens are now potentially viable on phones and tablets to a wider audience
- Good first step

## What about the future?

- Better head worn form factors
  - Limitations
    - Battery life
    - Field of view
    - Comfort
    - UX – how to control and interact with AR?
  - Better Tracking Tools
    - Object Recognition (AI?)
- Content Tools
  - Authoring Platforms
  - Content Management Platforms
  - 3D Data Tools – Decimation
- Collaboration Tools

# Thank You!
