

# PORTING ON A BUDGET: “There and back again”

**Lucas Farina**  
**COO @ DX Gameworks**

March 20-24, 2023  
San Francisco, CA

*Why should you care?*

# **Why should you care?**

Why should you care?

# Why should you care?

- Converting an experience to new platforms
- Reaching more people!
- Increasing your chances of success!

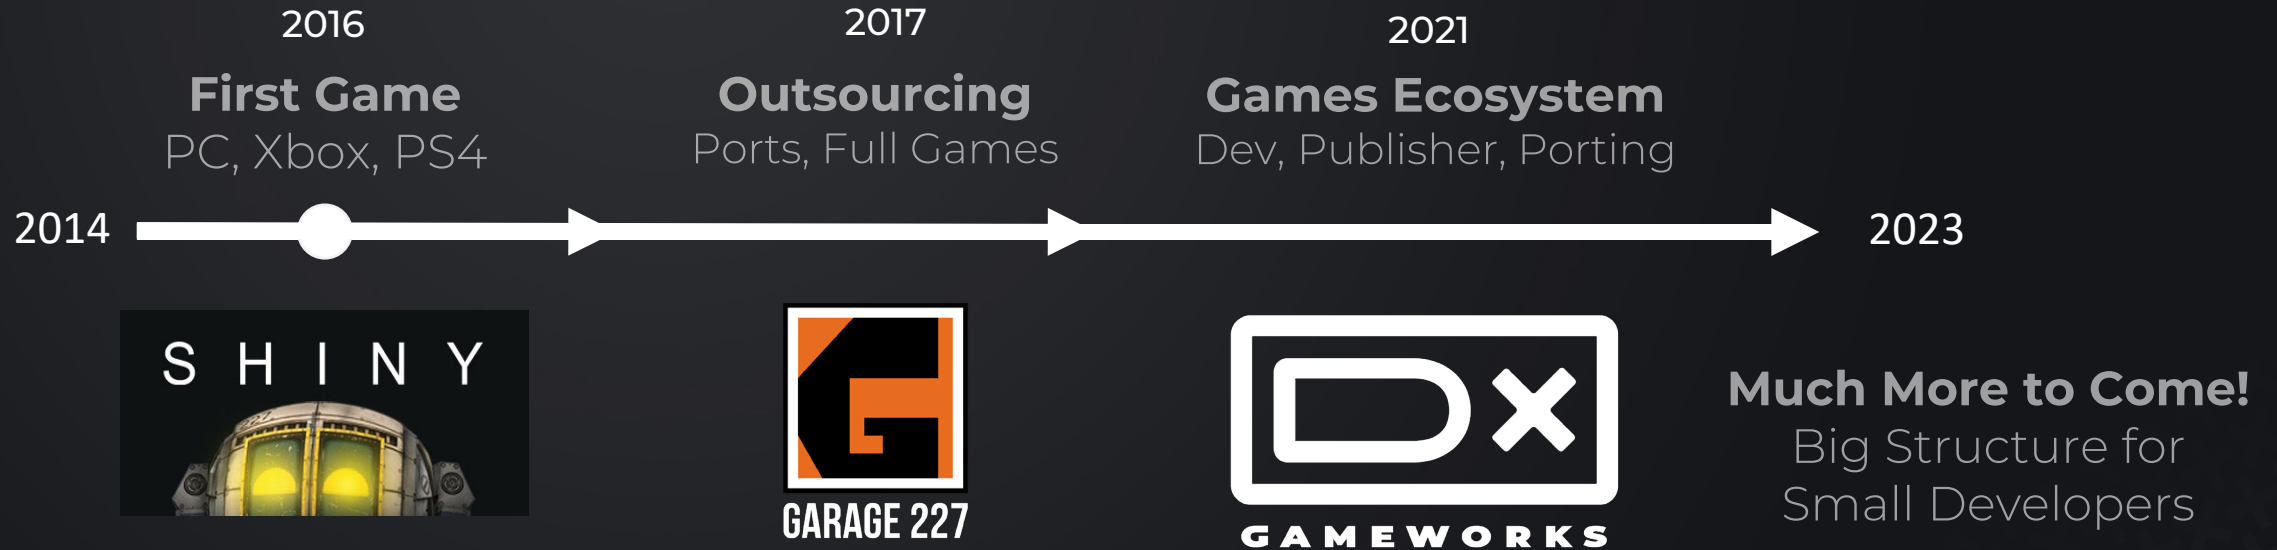

# Why should you care?

Why should you care?

The road so far

From Indie to Outsourcing, to LATAM Games Ecosystem

# Why should you care?

Why should you care?

## The road so far

- Ported 20+ games, helping them reach more players!
- Helped 31 Game Developers (+ Publishers and Clients)

Why should you care?

# Why should you care?

- **Save Money!** – If you follow these tips, it will be cheaper and faster to port, either with Porting Houses or Doing yourself.
- **Proven Porting Process** – Get an insight to a process that ported about 20 games so far.

On Budget and On time.

Thank you Xalavier Nelson  
for the help and meme <3

# Challenges

# Challenges

- **Always a new adventure** – New platforms, new generations, new technologies, new source, new plugins.

- **Dealing with somebody else's precious** – Some things need to change, but everything should be about converting what's already there.

- **A wizard is almost always late** – It's very likely will be dealing with a very tight schedule.

*Improving your chances*

# Improving your chances

Improving your chances

# Improving your chances

1. “One source to rule them all”

UNREAL  
ENGINE

Improving your chances

# Improving your chances

## 2. The Fellowship of the Porting

- **Original Dev** – Double-check with people who already know the code!
- **The Publisher** – Good communication with the people in charge of the platform portals, age ratings, localization, store front etc.
- **The QA** – Good communication with the people helping ensure your quality and success.
- **The Platforms** – Good relationship with the platform holders, so you learn how to navigate the process.

Improving your chances

# Improving your chances

## 3. Plan Ahead

Legolas!  
What do your elf eyes see?

- Engine Version
- Third-Parties and Plugins access
- Controller Support
- Age Ratings
- Localization
- Portal Configuration
- Achievements
- CQA
- Unity Key!

Improving your chances

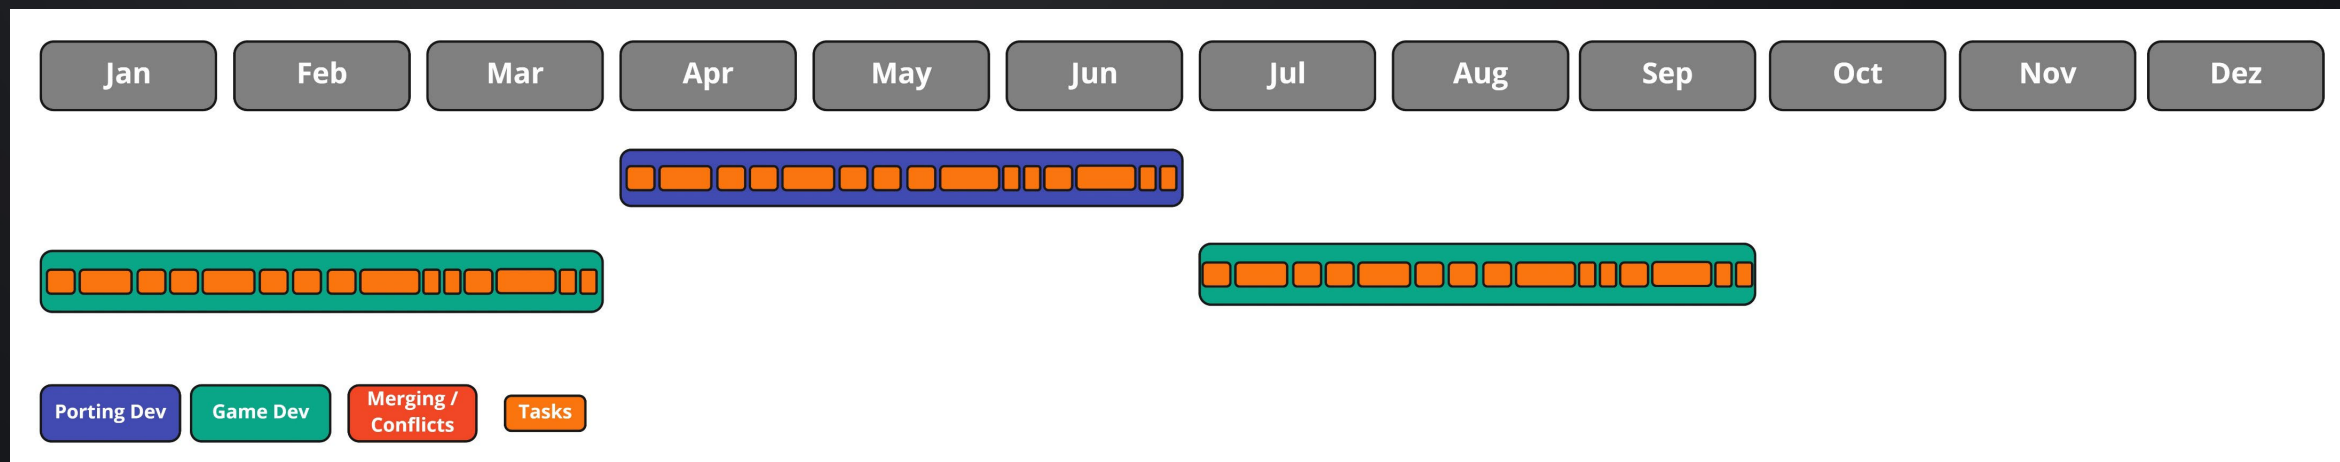

# Improving your chances

## 4. If you can, freeze it first

Always easier to shoot a still target.

This is what a “freeze-port-continue” scene looks like.

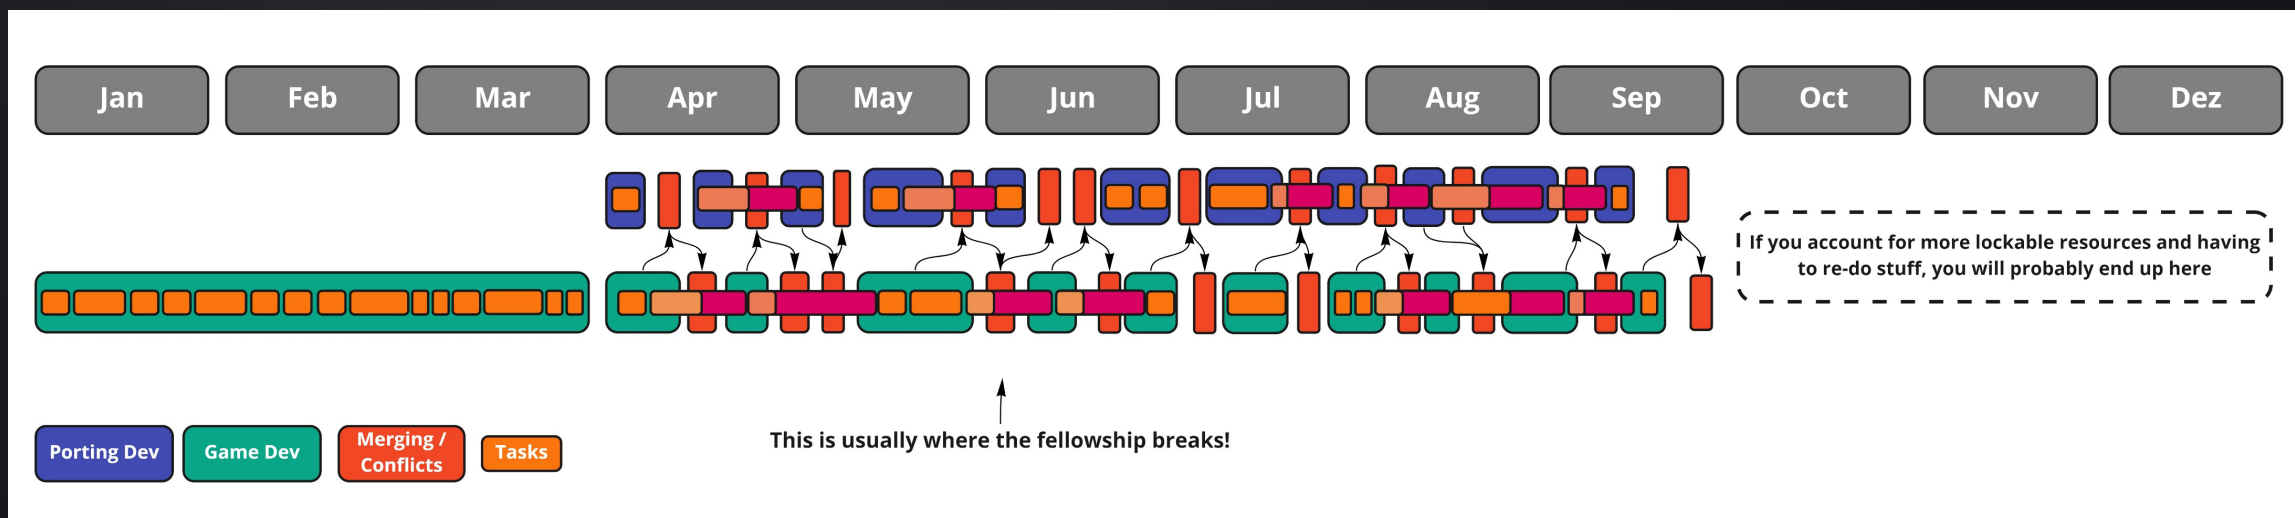

Improving your chances

# Improving your chances

## 4. If you can't

- Two different teams, one source.
- It will probably take the same time, much more stress.

Improving your chances

# Improving your chances

## 4. Really! Still wanna try?

**Welcome to Hotel California:**

**You can check out any time you like, but you may never leave!**

**It can be done, but it's not cheap, and rarely faster.**

# Process

# Process

- 0. Base-Reference
- 1. Ported Version
- 2. Enhanced Version
- 3. Certification Candidate
- 4. Certification!
- 5. Post-Launch Support

# Process

## 0. Base-Reference

**Never follow your nose**

- **Original Dev Build** - Ask for a build from the original dev team for the original platform.
- **Your own Build** - Make sure you can get the same build for the original platform on your side and compare.
- **Compare** - This step is all about proving to yourself that you have all the materials needed.

# Process

## 1. Ported Version

**Not beautiful yet, but at least is something**

- **Compatibility** – Fix all compiling issues, shader issues, materials and things missing.
- **Input** - Make sure you have input working enough to play, any core UI changes should also be handled here.
- **Ugly but Full Content** – You will still have blockers and crashes, but it should be possible to complete the game, even if you must reopen the game.

# Process

## 2. Enhanced Version

**Make it run!**

- **Performance** – Make sure all the content hits at least the agreed target average framerate.
- **Stability** – Get rid of all crashes and blockers.
- **Fix it** – Get rid of all known “porting” bugs, test against the base-reference to separate porting bugs from game dev bugs.
- **QA** - Good time for a QA run.

# Process

## 3. Certification Candidate

**For Frodo!**

- **Platform Integration** – Integrating achievements, cloud-save features, active-user management, stats and many more...
- **QA Fixes** – Get rid of all bugs risen by QA.
- **Localization** – Latest localization should be in.
- **Prepare to ship** – Authoring, credits and meta, such as Age Ratings, localized logos, splash screens etc.
- **Ready for Cert** - Good time for internal Certification tests, make sure you don't mix up button images etc.

# Process

## 4. Certification

Cast it into the fire!

Fix any Certification issues

# Process

## 5. Post-Launch Support

**Give it back!**

- **Fix it and patch it** – No matter how good the QA, no one can find bugs like players.
- **Merging Back** – Make sure all changes are integrated with the original platform so the game can live on.
- Be thankful for the journey!

# Thank you!
