# Culture

# First Impressions Matter

- Our goal is to **bridge cultural gaps** and create a game world users can accept, embrace and find a sense of belonging inside of
- **Pick and Remix** marketing materials according to the values and tastes of Chinese users

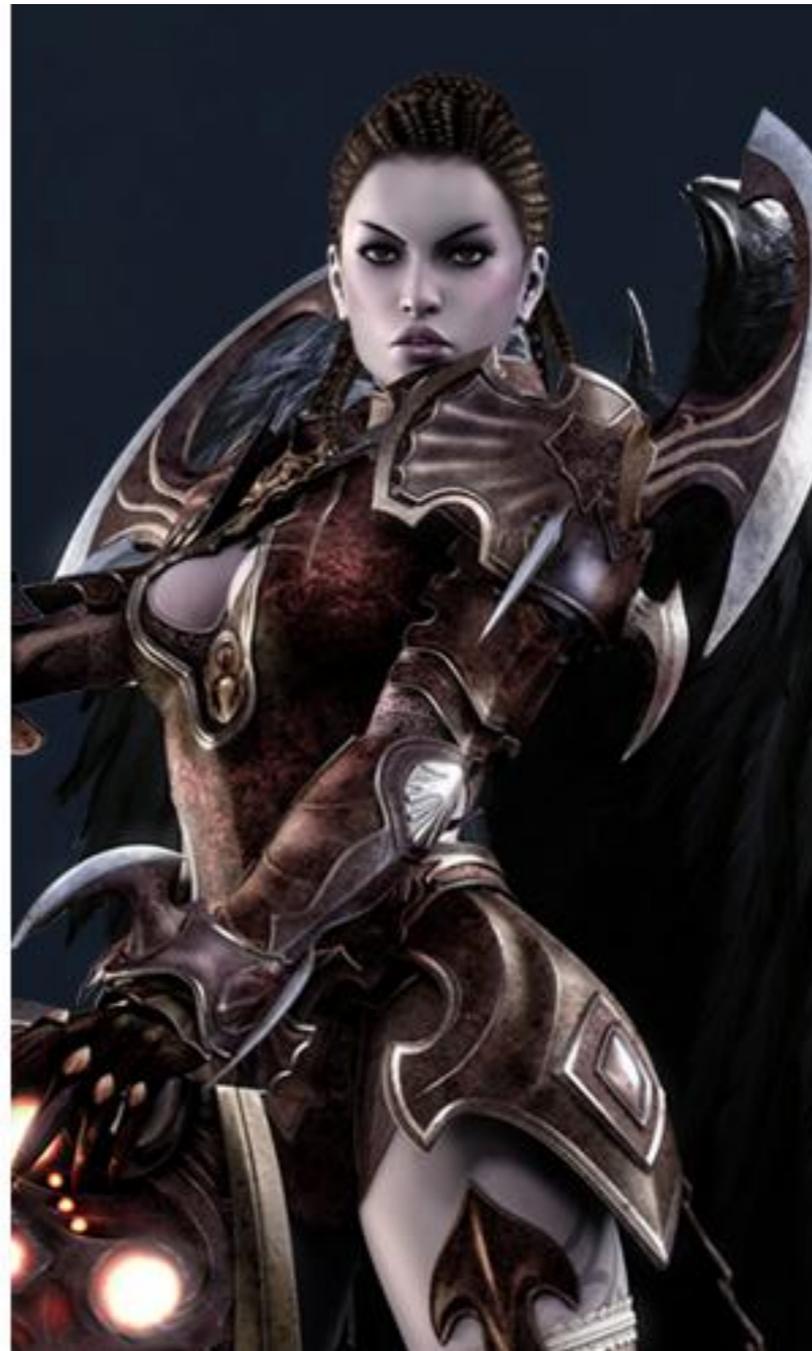

# First Impressions Matter

## Choice 1 Elyos

# First Impressions Matter

**Choice 2**  
Asmodians

# First Impressions Matter

**Choice 3**  
Balaur

# Less is More & Easier to Understand

## The West

# Less is More & Easier to Understand

## China

# Less is More & Easier to Understand

- When we first launched AION – we told users our game has ‘Two Races, Eight Classes’
  - No in-depth details about differences between races, classes, backstories, ...
- We introduce the **core components** of the game world and expand their understanding of it **step-by-step**

# Localized/Custom Content is Key

**Cheongsam**

**Panda**

# Localized/Custom Content is Key

- **Satisfying tastes and preferences AND showing Chinese users that ‘We care about you’.**
- **Taking the best Western game dev ideas and adding the right Chinese/Asian elements to create the perfect blend.**

# Gameplay

# Driving Engagement

- In year 2010, 204 online games rated by government launched in mainland china.
- For whatever type of online game, you will find countless similar products in the market.
- If a game cannot attract people in its beginning stages, it then has inherent disadvantages in china.

# Driving Engagement

- We beta-test extensively before commercially launching an online game.
- Our goal is to maximize user engagement and retention through deep analysis of Chinese user behaviour.

# Driving Engagement

## Losing Rate

Hard ?

Boring ?

Unreasonable ?

Bug ?

Translation ?

# Driving Engagement

- We design beginners guide systems that zero-in on specific in-game hurdles
- Teaching users exactly what they need to move onto the next challenge; **nothing more, nothing less**

# Driving Engagement

## Guiding System

# Maximizing Retention

- Players tend to leave because there aren't any worthwhile **“carrots”** or because the **“chase”** has become boring.
- How do we create in-game targets?
- How do we empower users to achieve those targets?

# Maximizing Retention

- For Chinese users “fun” is the cherry on top.
- More importantly, users must **get-back** something **proportional** to what they **put-in**

# Maximizing Retention

## Targets

= Time + Technique + Money

# Maximizing Retention

## Returns

|       |      |
|-------|------|
| 生命力   | 5034 |
| 精神力   | 9264 |
| 力量    | 90   |
| 体力    | 90   |
| 命中    | 100  |
| 敏捷    | 100  |

| 移动速度  | 7.56 |
| 魔法增幅力 | 1708 |
| 魔法命中率 | 1067 |

# Maximizing Retention

## Bonus

# Maximizing Retention

- Many tools/paths for users to achieve a unique target
- During operation, we push activities designed to incentivize users and **expand # of ways** users can achieve their targets.

 活动时间: 6月16日至6月22日  
 发奖时间: 6月17日至6月23日兑奖  
 活动状态: 进行中

**万千"宠"爱摄影大赛**

# Maximizing Retention

- In China, there is a segment of “**super whales**” that are willing to spend **\$\$\$\$\$\$\$** in game
- Time, player skill level, ability/willingness to pay can all be converted to different in-game advantages that target different user segments.
- In most Chinese online games, **10% of users generate 90% revenues**
  - The subscription-based model does not effectively incentivize, engage and monetize this demographic

# Justice

# Adjusting for Regional Differences

- For a long lifespan, developers must listen to player feedback and tweak game content accordingly
- However, gaming habits and content expansion schedules vary across all markets

# Adjusting for Regional Differences

Lv 50-55

Korea: 19 Hours

China: 10 Hours

# Adjusting for Regional Differences

- Most game developers pay more attention to the preferences/expectations of users from their respective markets
  - **Overseas users** are frequently ignored and regarded as a secondary priority
- Different regions require different game balancing.

# Adjusting for Regional Differences

# Adjusting for Regional Differences

- Chinese dev teams often employ a special **‘value engineer’** to deal specifically with game balancing differences across regions
- We learn about users through data mining
- Data in hand, we work with developer partners to make adjustments and better satisfy Chinese user preferences/expectations

# Defeating Bots and Hacks

- Vicious third-party plug-ins are capable of modifying local files, intercepting data packets and uploading fake data onto servers
- In China, such cheats are popular with many players
- Any online game company interested in the China market must overcome these issues

# Defeating Bots and Hacks

### 永恒之塔2.0 [aion.sdo.com](http://aion.sdo.com) 新世界 新服务

2010年12月29日,《永恒之塔2.0:进军龙界》开放测试盛大开启,全新的世界已震撼来袭!“新世界 新服务”将伴您走过龙界大陆的每一寸土。当以下五个按钮全部点亮后,永恒之塔2.0的公测时间将揭晓,让我们一起期待全部点亮的那一刻!

千万巨奖反挂 新世界绝无挂 → 十大公会 火热评选 → 2.0客户端 开放下载 → 12月29日 开放测试 盛大开启 → 黄金时代 3月9日公测

# Economics

# The Invisible Hand

- Managing game balancing and controlling cheating bots are key responsibilities
- However, the most important is the **supervision** of the in-game economy
- The total amount of currency circulating in a game will inevitably rise.
- Therefore, we must pay attention to the ratio between items purchasable by in-game currency and hard currency.
- **Hard currency items** are important to a game, they can be armor, weapons, or items to be traded; they are equivalent to gold in the real world.

# The Invisible Hand

## 200 Platinum Medal/Day

Korea: 

China: 

# The Invisible Hand

- In conclusion, our operating policy is to maintain inflation at an appropriate level, resulting prosperity of all players.
- We hope that players will notice the increase in their wealth obviously.
- Healthy development of the game's economics will be realized by minimizing polarization of players properties.

# Investment and Loyalty

- Users want to keep gaming with “old” gaming partners.
- The departure of gaming partners is a common reason for players to leave a game
- The more invested a user is, the more likely they will remain.
- According to our statistics, the retention rate of *paying users* is **3X** that of *non-paying users*
