If any major publisher ever hires this man for "blockbuster" titles, I will quit gaming forever, or at least modern gaming.

Yeah, he's like ... the forbidden gamedesigner
! 21 minutes ago

Everything written in this article, and its author, continue to jade me this industry more and more. I need alcohol. This made me want to vomit.

FULLFORCE098 / NOVEMBER 7

"When I compare Arkham Origins to Gods Among Us, my sense as a player and a game designer is that NetherRealms has made an undoubtedly better game, but a worse free-to-play product."

BURN. IN. HELL.

Ethan Levy - you are a *horrible* person.
YOU are what's wrong with video games.

Eight-Bit GenerationUEthan Levy

What annoys me about this article is that I agree with the general premise (that free-to-play videogames are not inherently bad and are a response to market pressure) but I really hate the condescending, offensive, effete, stereotypical San Francisco attitude

↑ [-] [score hidden] 39 minutes ago

↓ Get it through your thick skull that CONSUMERS HATE F2P PAY GATES, which seem to be an idea you spurt off about nonstop since developers and the marketing ~~authorities~~ like them. You are damaging this industry. Please stop it.
Figure out a way to both get paid and keep your integrity.

↓ Let's talk about Dragon Age Legends. I cannot believe ANYONE would hire you as a consultant after that fucking abomination of the ideas your seem to love so much for some reason. Great job "producing" it into the dumpster. You're such a failure and cancer to this industry. Just leave and go grub for money elsewhere, jackass.

Look at the author's job title. Just look at it. That's not a career, that's a punishment for being an abusive prison guard in a past life.

PARIS — IF all goes according to plan, I'll turn 44 soon after this column appears. So far in my adult life, I've never managed to grasp a decade's main point until long after it was over. It turns out that I wasn't supposed to spend my 20s frantically looking for a husband; I should have been building my career and enjoying my last gasp of freedom. I then spent my 30s ruminating on grievances accumulated in my 20s.

This time around, I'd like to save time by figuring out the decade while I'm still in it. Entering middle age in Paris — the world's epicenter of existentialism — isn't terribly helpful. With their signature blend of subtlety and pessimism, the French carve up midlife into the "crisis of the 40s," the "crisis of the 50s" and the "noonday demon" (described by one French writer as "when a man in his 50s falls in love with the babysitter").

The modern 40s are so busy it's hard to assess them. Researchers describe the new "rush hour of life," when career and child-rearing peaks collide. Today's 40ish professionals are the DITT generation: double income, toddler twins.

“There are no grown-ups. We suspect this when we are younger, but can confirm it only once we are the ones writing books and attending parent-teacher conferences. **Everyone is winging it,** some just do it more confidently.”

神拳當面插下進步火鉢
撥心還巧就拿就跌舉手
不得留情○一條鞭橫直
披砍兩進腿當面傷人不
怕他力粗膽大我巧好打

Hi Ethan!

Greetings from the far north outpost of Vancouver! Hope you're having a fine week. I've been enjoying watching the various paths of EA 2D folks in the past couple years, so I was happy to hear about the new Quarter Spiral collaboration between you and Alex. I follow your blog posts with far more fervor than is suitable for somebody who isn't an active member of the game development community :).

As you may recall, I've been having a grand time working on my MSc degree at the University of British Columbia since I left EA 2D, and I've lately been debating whether to continue on in academia for a PhD in computer science or to return to commercial game development. After a not insignificant chunk of time considering the issue, I've decided to go the academic route and begin applications for PhD programs beginning in Fall 2013. My interests have focused even more sharply on the topics that most interested me when I first started grad school: realistic and responsive character control/animation and interactive environments. Following completion of my PhD (which should take ~5 years), I intend to return to either the games industry proper or a related middleware company (eg: [NaturalMotion](#)) to do cutting-edge character animation work.

A critical part of these applications are letters of reference from past faculty and employers. Based on my time working on the *Dragon Age* projects while you acted as producer/project lead, I believe that you have by far the most comprehensive view on my productive capabilities as a software engineer in industry. As such, I wanted to ask whether you would be willing to write a letter of reference on my behalf for inclusion with my PhD applications.
