**HOW DO I MANAGE  
PROGRESSION?**

# LINEAR GAME PROGRESSION

If linear game progression can be represented by a line...

# OPEN WORLD GAME PROGRESSION

A mission area can be represented by a simple shape, like a circle...

...then the radius of a circle can act as your progression in an open world setup.

# HOW TO CHOOSE YOUR INGREDIENTS

# DIFFICULTY

## FIRST CHOOSE A DIMENSION

Identify which values are  
important for your project and  
what you want to show  
progression on

ACTS »

## CHOOSE A THEME

With the game's important dimensions Identified you can then identify which flavor of that theme mission or layout will represent

## GAMEPLAY FOCUS

- **ACROBATICS**
- **STEALTH**
- **FIGHT**

## **LIST APPROPRIATE INGREDIENTS**

Take your game's ingredients and start listing which ones are appropriate and best represent your sub dimension

## **STEALTH**

- **CROWD**
- **MONK PATROLS**
- **HIGH BEAMS**
- **HAY CARTS**
- **BENCHES**
- **2 meter COVER**

# **EXAMPLE**

## **EMOTIONAL THEME: VERTIGO**

- **SWING POLES**
- **CORNER SWING**
- **ARCHERS**
- **TIGHTROPES**
- **HIGH BUILDINGS**
- **FLYING BIRDS**
- **WIND AMBIENCE**

**ASSASSIN'S CREED II:  
SAN GIMIGNANO**

# **EXAMPLE**

## **NARRATIVE PACING: DESTABILIZE**

- **ENEMY BEHAVIOR**
  - **TELEPORTING**
  - **MELEE**
  - **WALL CRAWL**
  - **SMOKE**
  - **GRENADE**
- **GRAFFITI**

**BIOSHOCK:  
FORT FROLIC**

## WHAT'S THE **DOWNSIDE** OF THIS METHOD

Dependent on block out and  
existing ingredients

Quickly outdated

It's not in 3D!
