- Categorizes surfaces (ceilings, walls, etc.)
- Search for shapes (objects) in scene
- Find spaces to place objects of arbitrary sizes

Persistence

Spatial Anchors

- Not one world coordinate system
- Anchors GameObject to part of real world
- Spatial Anchors adjust position over time
- Save/Load from Spatial Anchor Store

Working Around Limitations

- FOV
- Battery life
- Mobile GPU / CPU performance issues
- Control constraints

It's called **MIXED** Reality for a reason!
