

Training Designers to Collaborate with Researchers

Reframing, Scaffolding, and Roles

Benjamin Stokes

@bgstokes

AMERICAN UNIVERSITY

Impact?

40% employed
outside of traditional
game companies

(HEVGA in 2015; alumni undergraduate + graduate)

barriers

1. Politicized terms
2. Rigid methods
3. Domain blindness

1/3 of our alumni have taken a
game research course

(HEVGA in 2015; alumni undergraduate + graduate)

Problem:

On the shoulders of giants?

Health behavior change:

Packy and Marlon

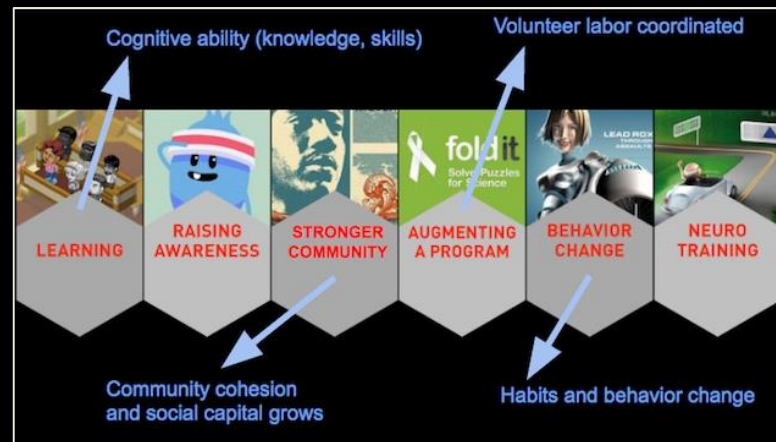

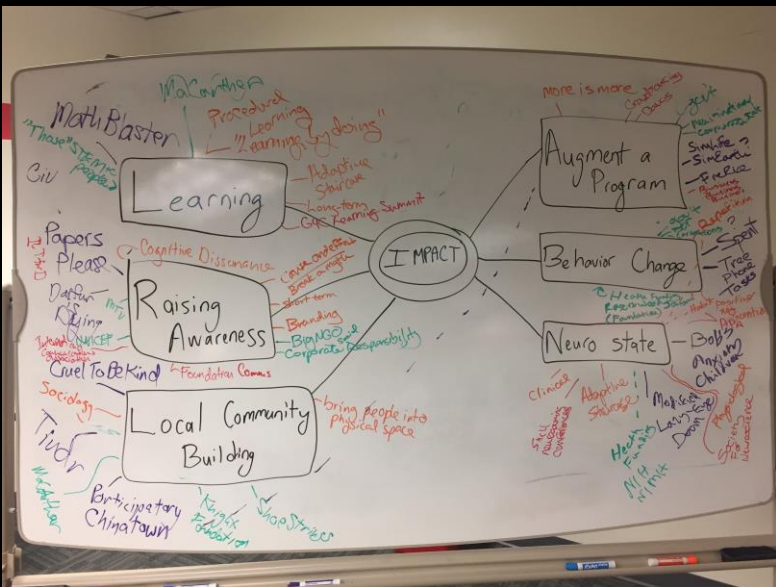

- 77% decrease in hospitalization rates
(Brown et al., 1997)

Teach research as a strategy

1. When & where
2. Research \neq research *design*

SOLUTION: bottom-up typologies

Pinch-point: “I’m not a researcher”

(Research is separate from design)

Pinch-point: “I’m not a researcher”

(Research is separate from design)

MS Game Studios

Pinch-point: “I’m not a researcher”

(Research is separate from design)

Reframe:

1. No game would launch **without** research
2. Designers **ARE** researchers
3. **Collaboration** is a competency
(not a funding arrangement)

What are universities doing?

Pinch point: **lack of demand** (quality suffers)

"in the fishbowl"

Heather Desurvire

SOLUTION1: **Paired classes** = space for analysis

SOLUTION2: **Language & focus via heuristics**

PLAY and GAP principles (2009)

SOLUTION3: **Findings as video**

"the gray areas are essential to...player experience"

Carnegie Mellon University
Entertainment Technology Center

Carnegie Mellon
Human-Computer Interaction Institute

Pinch point: jagged collaborations

(lack of structure)

Jessica Hammer

SOLUTION1: Tandem design model

SOLUTION2: APIs for collaboration

...greater creativity??

Pinch point: single path

SOLUTION1: Dialog on values

SOLUTION2: In media res

SOLUTION3: Competing solutions

(sketch from Thomas Baldwin)

Spread what works.

*Do you have
solutions that work?
Let's share them!*
