VRDC FALL 2017

OpenXR: Converging on a Widely Accepted VR API Standard

Yuval Boger, CEO, Sensics Joe Ludwig, Programmer, Valve Kaye Mason, Daydream API Lead, Google Paul Pedriana, Graphics Engineering Manager, Oculus VR Nick Whiting, Technical Director, Epic Games

VIRTUAL REALITY DEVELOPERS CONFERENCE FALL 2017 | SEPTEMBER 21-22, 2017 #VRDC17

Today's panel

Members of the OpenXR workgroup:

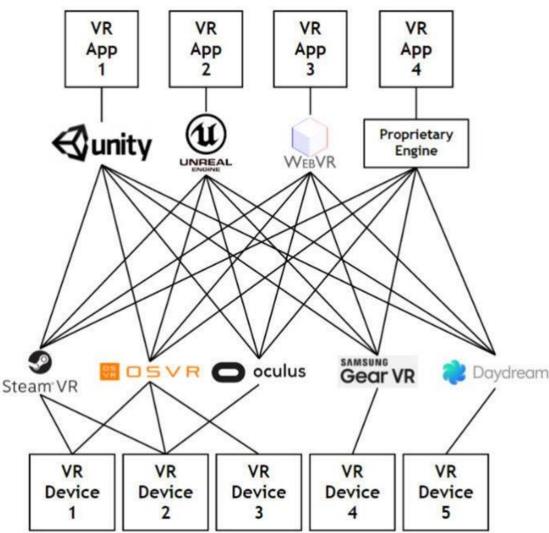

- Epic Games
- Google
- Oculus VR
- Sensics
- Valve

The Problem

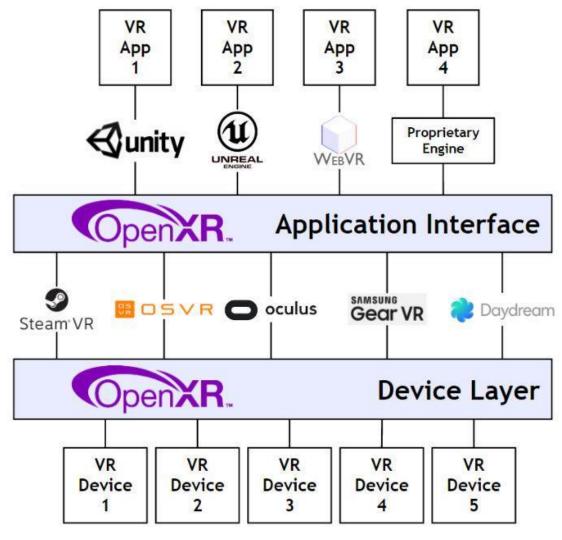

Without a crossplatform standard, VR applications, games and engines must port to each vendors' APIs.

The Solution

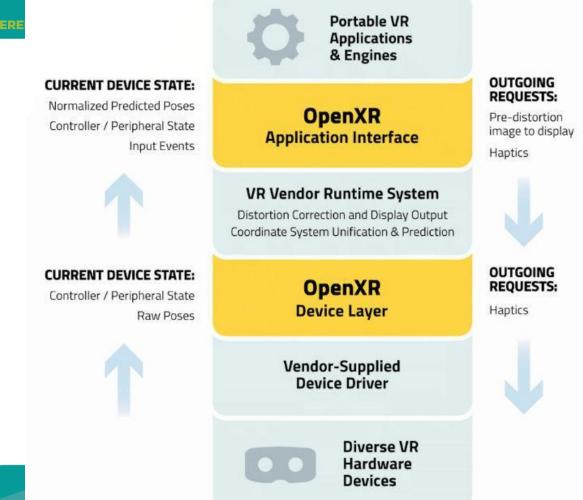

- A cross-platform VR standard that eliminates industry fragmentation.
- Applications can be written once to run on any VR system.

Architecture

- Application interface
- Device interface

Industry Support

Initial questions

- When will OpenXR 1.0 be ready?
- What's in it and not in it?
- Is [company] part of the effort? How can I join?
- We're using [vendor API] today. Will I need to rewrite?
- Will it run on [platform]?
