dittomakesgames@gmail.com

twitter:
[@dittomat](https://twitter.com/dittomat)

i was so alone

i'm never alone !!

lots of project simultanously

Constraints:

"if you can't do it quickly,
there's probably a better way
of doing it."

one line of code for sfx

Constraints:
wobbly graphics

Frame:
one instrument.
the OP1.

implementation philosophy:

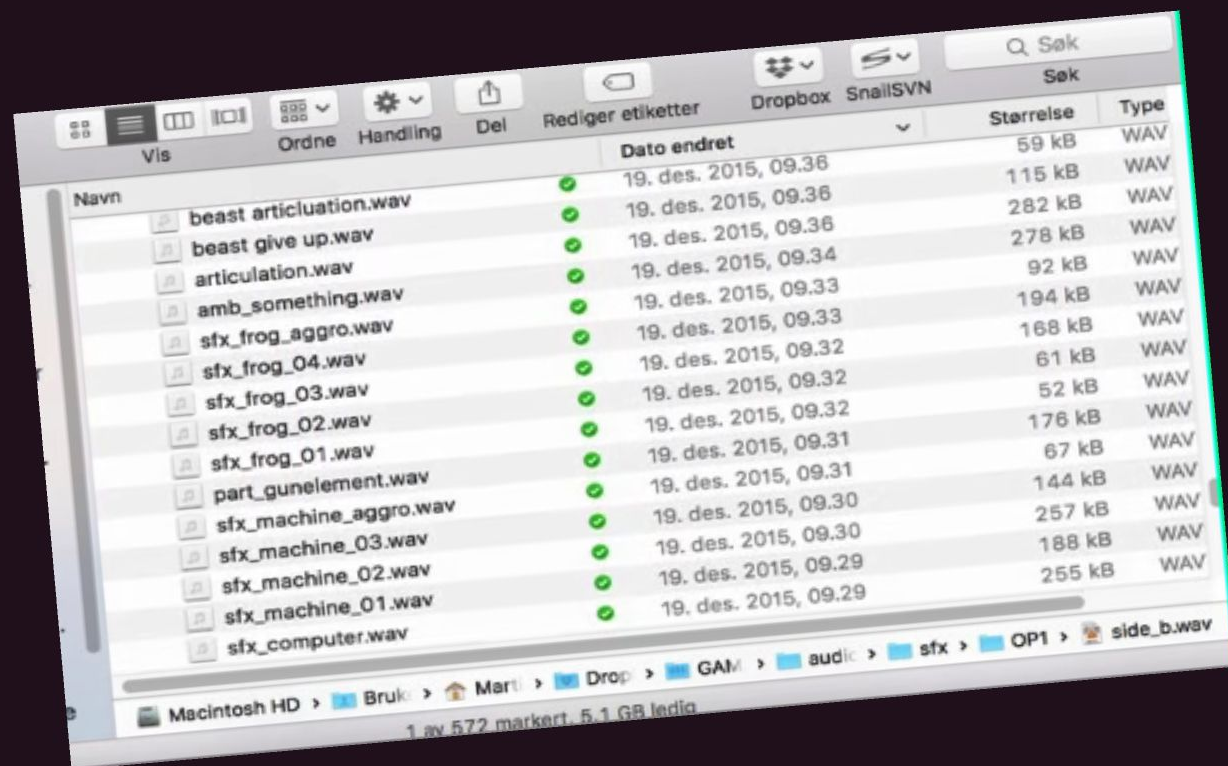

"make it candy"

GØNNER

footsteps... who needs em

billions of sounds,

"all square shapes in square
holes"

gotta go fast

process

fridays?

fuck-you-fridays!

(fyf for short)

THE LOOP!

The loop example 1:

new content!

Martin looks at content, makes
100 sounds

Ditto gets sounds and throws
a couple at the game

martin iterates,
a third, a third, a third

The loop example 2:

there's a good sound here!

lets put it somewhere!

Martin is happy! :)

baby you're perfect:

"there's a correct way of doing
it"

implementation is mixing.

burnout:

jamming takes its toll

not knowing what is expected
of you
(but still trying to live up to it)

please bear(bare(bauer?)) in
mind!

take aways:
complete trust
explicit constraints

take em outs:

communicate yo

plan ahead
(not 2 years after)

we recommend!

hierarchy is old
school.

have some sort of
plan. maybe.

trust the loop. trust
eachother.

fuck you fridays !!
