ALPHABEAR 2

Gameplay

- Spell words with a grid of letters
- Used letters reveal new letters around them
- Unused letters eventually wither and become permanently unusable
- Game ends when there are no words left (or the timer runs out!)

Metagame

- Progress through a 10 chapter campaign
- Collect bears
- Find interesting synergies
- Fix the space time continuum!

- What is Alphabear 2?
- Streamline and Enhance Core Gameplay
- Encourage Bear Collections
- Iterative and Incremental Design

Simplified Scoring

- Word score is just sum of letter lifetimes
- Bear scoring is just biggest bear area * 4
- Offers Interesting strategic choices

Rewards for Big-Bearing

- “Big Bearing” - using all the letters on a board
- Something many perceive as the goal
- Rewards exceptional victories & high skill

Early Finish

- Option to end after exceeding the target score
- Allows skilled players to progress quickly
- Offers interesting choice:
 - Save time or
 - Try for big bear reward

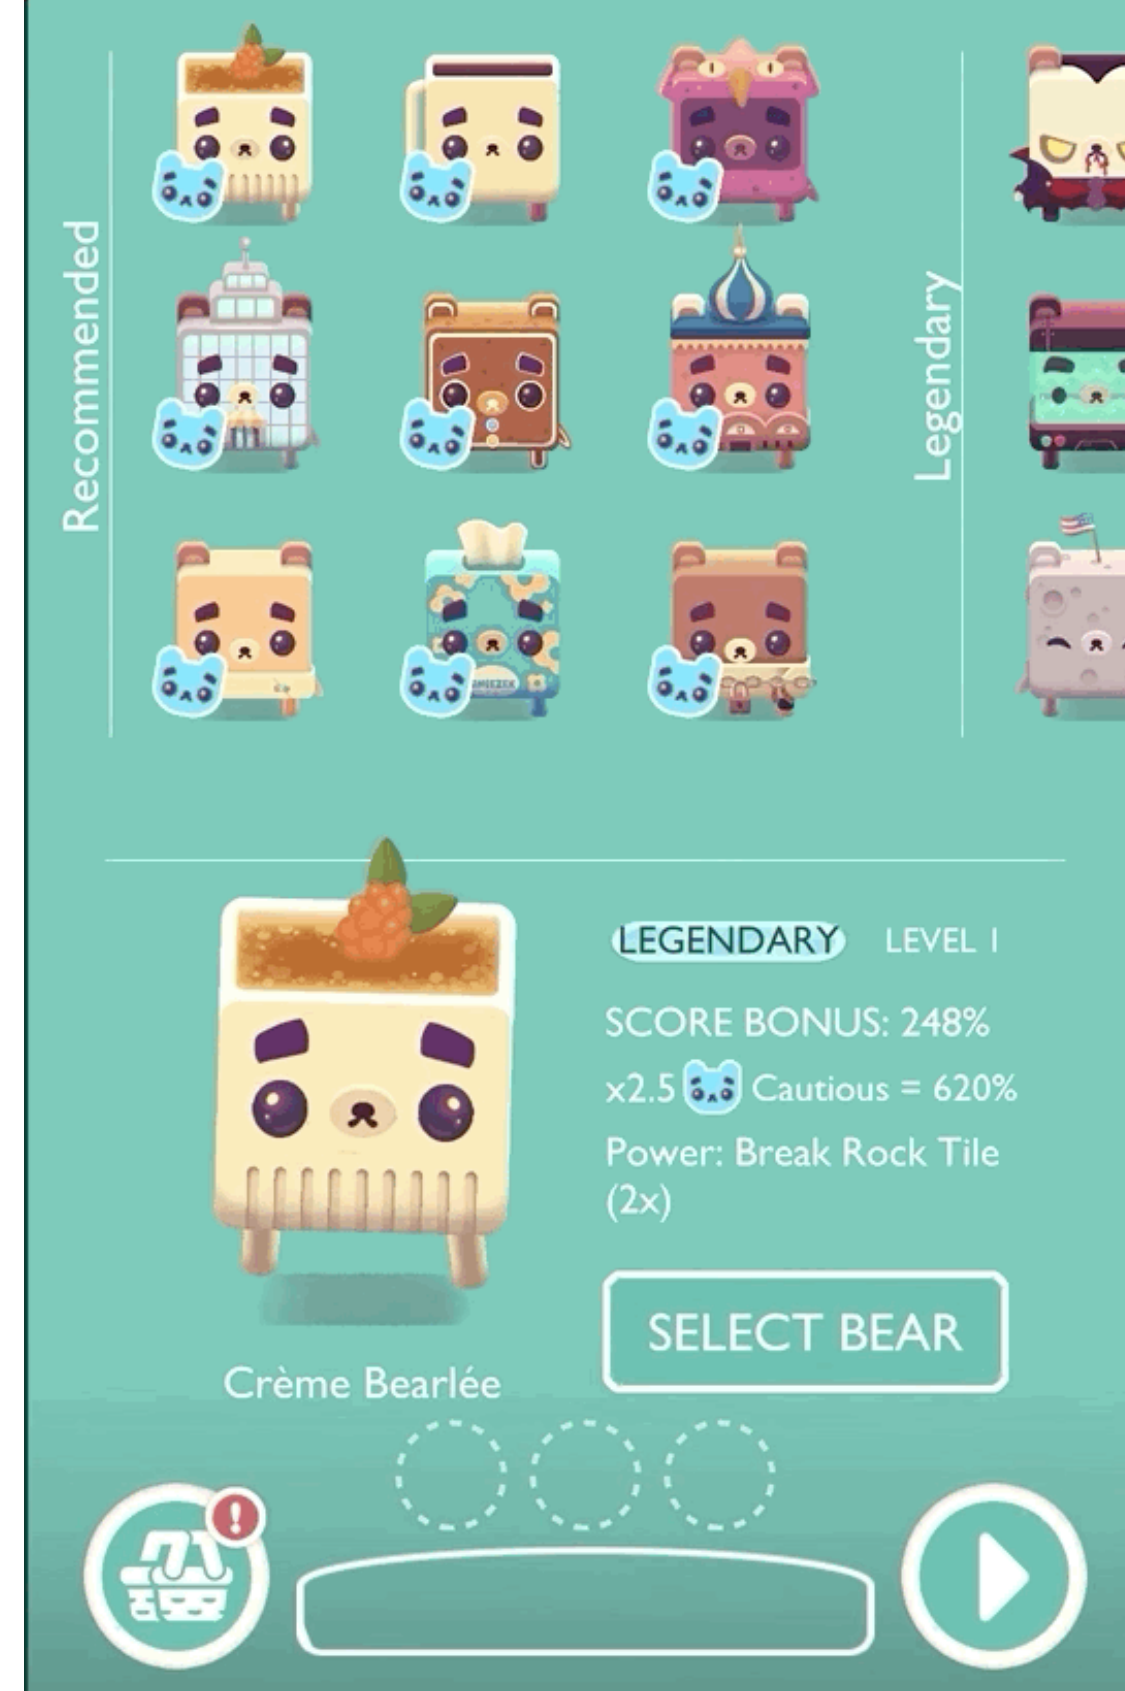

Special Tile Types

- Non-letters that have interesting properties
- Balloon tiles count up
- Revealing a Key tile reveals all Lock tiles

“Recommended” Bears

- Quickly find your most powerful bears
- Shows if you’re prepared for this game
- Ensures you don’t feel stuck... unless you are!

- What is Alphabear 2?
- Streamline and Enhance Core Gameplay
- Encourage Bear Collections**
- Iterative and Incremental Design

Bear Collecting

- Need players to care about a diverse bear collection
 - IAPs speed up discovery, not gate it
- Bears have one of 5 affinities
- One affinity gets double score bonus on each board
- Disabled score bonuses and banned affinities
 - Focus on power synergies, not bear levels

More Bear Powers!

- Passive bonuses like Alphabear 1
 - e.g. “Extra R’s”, “+10 points for words starting with R”
- Striving to create interesting synergies

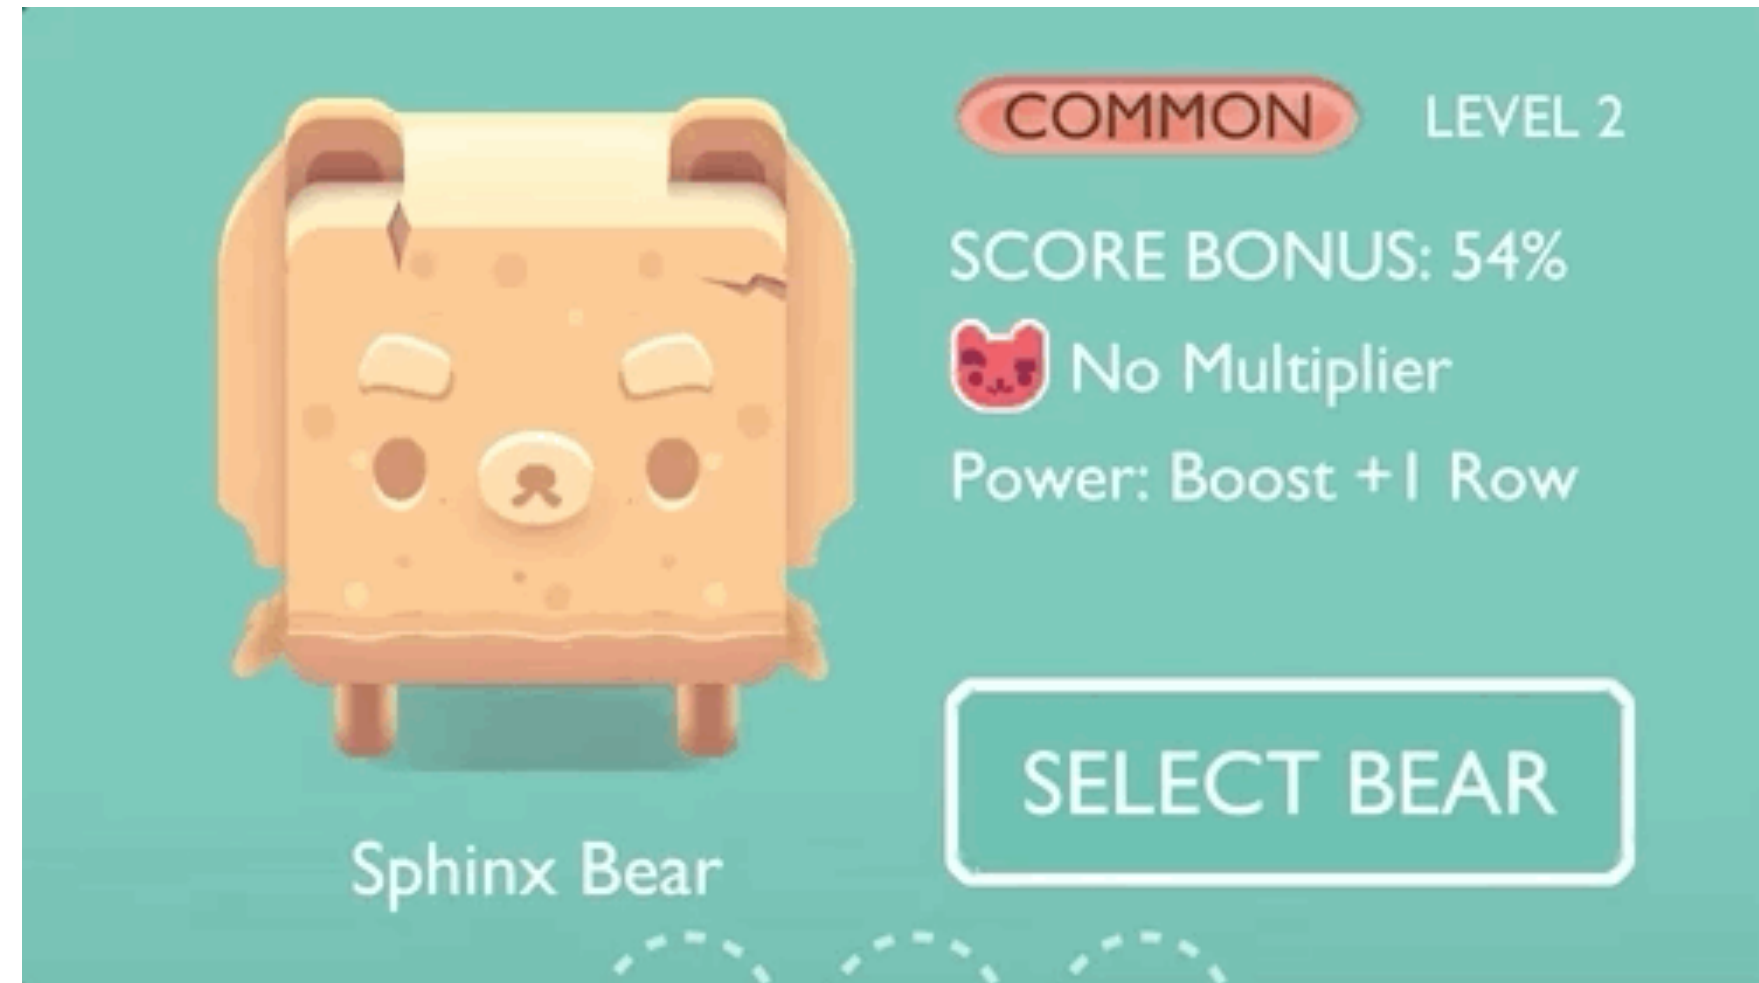

“Active” Bear Abilities

- Triggered strategically by the player
- Directly impact the match board state
- e.g. “+1 all tiles”, “Swap tiles”, “Reveal -CPU”
- Solves “red letter anxiety”

Impact of “Active” Bear Powers

- Allows players to fix a bad board state or double-down on a good one
- Dovetails with new scoring system

Bear Schools

- Give player control over bear leveling
- Play a game, earn a level for a specific bear
- Diplomas system makes low-rarity bears meaningful in the late game

- What is Alphabear 2?
- Streamline and Enhance Core Gameplay
- Encourage Bear Collections
- Iterative and Incremental Design

Iterative and Incremental

- Started with Alphasbear 1
 - Playable from day 1!
- Small, deliberate changes
- Regular builds and internal/f&f playtesters
 - e.g. Bear schools
- Meta Simulation

Recap

- Iterative and Incremental design process helped us punch above our weight
- New special tiles and streamlined scoring enhance the core gameplay
- Bear affinities, schools, and new power combinations expand the meta and give players a reason to spend

Results!

- 7x increase in LTV
- 2019 Game Developers Choice Awards Best Mobile Game Honorable Mention
